the combined effects of population growth and aging have led to an increase in the number of cancers preventing diagnosing  
 treating and curing cancer are therefore more than ever imperatives facing medicine especially to continue the decrease in  
 cancers mortality rates and to improve the quality of survival over time the classic modes of treatment surgery external beam  
 radiotherapy chemotherapy have become more refined and efficient from the beginning of this century new therapeutic options  
 have been developed targeted cancer therapy targeted radionuclide therapy and immunologic therapies based on monoclonal  
 antibodies cellular therapy and vaccinations artificial intelligence and machine learning are also being introduced to the field of  
 oncology starting with the basic scientific principles relevant to oncology this book explains and makes these concepts and  
 innovations accessible to a wide audience especially in the interest of patients it also contributes to the oncological field of 4p  
 medicine with 4p standing for predictive preventive personalized and participative

the chapters in this book were first presented at the women in french biennial conference held in leeds in may 2004 the twelve essays explore the multifaceted commodification of the female body and provide insights into the mutations of french society and culture british and french scholars examine the paradoxes and contradictions embodied in various images and discourses related to health and illness from different perspectives ranging from sociological studies to analyses of working diaries children s medical encyclopaedias and literary texts the resilient female body as epitomised by the first world war nurse tends by the end of the twentieth century to be construed as the sanitised female body subjected to mind body dualities largely controlled by the medical professions thus maternity and related issues such as birth and contraceptive technologies figure as major themes with contributors revealing unresolved ambivalences other chapters focus on how women s economic activity can affect their individual health and potentially that of others a further prominent theme shows how for contemporary women writers serious illnesses such as cancer and madness in women can be seen as rich metaphors for the ills of a male dominated society duras s alcoholism and aragon s portrayals of prostitution are also discussed

health and climate change unraveling the connections researches the linkages between climate change and human health as reported from mexico the uk usa india bangladesh cameroon nigeria and cameroon the book s chapters cover the multidimensional impacts of climate change on various aspects such as habitability biodiversity natural resources and human health this information from developed and developing countries will be of immense interest to the global audience of researchers activists governments and others climate change one of the greatest challenges of the 21st century has serious adverse effects on human health extreme climate events increase mortality and morbidity the prevalence of water and vector borne diseases malnutrition and respiratory diseases climate change has serious effects on mental health mental health is

impacted directly and indirectly resulting in mental illnesses and suicidal mortality global heating due to the increasing greenhouse effect has disturbed the energetic balance of the earth and destroyed its fragile climate it is creating an atmospheric imbalance with toxins that are affecting the human nervous system and thereby impacting health provides research to understand issues and plan preventive strategies to mitigate the impact of climate change on human health includes case studies that encompass a range of themes concepts and theories which contribute to a better understanding of the problem in multiple regions and countries worldwide written by global experts in the field

this conference was organised in the framework of a series of initiatives taken by the european commission in order to stimulate reflection and debate on science and technology on a european scale focusing attention on subjects related to historical cultural ethical and social aspects of science and technology the originality of these initiatives conferences when compared with other initiatives in this field was to address the questions dealt with specifically within their european dimension attention was concentrated on the particularity of the situation in the field concerned in europe in comparison with other parts of the world the differences between european countries and regions the aspects related to the process of building europe the needs and possibilities of collaboration at european level etc the conferences organised in this framework have put together a broad spectrum of people from different horizons historians sociologists philosophers specialists in science studies researchers in natural and exact sciences as well as in social sciences and humanities people in charge of research and policy decision makers representatives from the industrial and entrepreneurial world and citizens associations etc organised by national or european institutions each conference drew together between 100 and 200 people the proceedings were systematically published and broadly disseminated
