mountain geomorphology integrating earth systems presents the papers of the 32nd  
annual binghamton geomorphology symposium held in 2001 in advance of the  
united nations designated 2002 international year of mountains the three co editors  
have collectively worked in mountain environments for over 70 years and brought  
together internationally recognized experts in mountain geomorphology from 7  
nations presenting research on mountain processes from around the world including  
the usa canada china europe and south america the volume utilizes earth systems  
as a unifying and organizing theme examining the interactions of the four earth  
spheres lithosphere biosphere atmosphere and hydrosphere in the context of

geomorphic processes in mountain environments the volume is also a festschrift in honor of professor john d jack vitek long time editor of geomorphology and an outstanding mentor to each of the three co editors papers presented in the volume represent cutting edge examinations of mountain landforms geomorphic processes in mountains and the application of advanced remote sensing and geographic information science technologies for the study of mountain geomorphology the book should be of interest to all geomorphologists and to physical geographers and geologists interested in mountain environments mountain geomorphology integrating earth systems is the only book of its kind and stands as a testament to the importance of mountains as locations for studying the interaction of geomorphic processes within an earth systems perspective
