The Ottoman army had a significant effect on the history of the modern world and particularly on that of the Middle East and Europe. This study, written by a Turkish and an American scholar, is a revision and corrective to Western accounts because it is based on Turkish interpretations rather than European interpretations of events. As the world's dominant military machine from 1300 to the mid-1700s, the Ottoman army led the way in military institutions, organizational structures, technology, and tactics. In decline thereafter, it nevertheless remained a considerable force to be counted in the balance of power through 1918. From its nomadic origins, it underwent revolutions in military affairs as well as several transformations which enabled it to compete on favorable terms with the best of armies of the day. This study tracks the growth of the Ottoman army as a professional institution from the perspective of the Ottomans themselves by using previously untapped Ottoman source materials. Additionally, the impact of important commanders and the role of politics as these affected the army are examined. The study concludes with the Ottoman legacy and its effect on the republic and modern Turkish army. This is a study survey that combines an introductory view of this subject with fresh and original reference-level information divided into distinct periods. Uyar and Erickson open with a brief overview of the establishment of the Ottoman empire and the military systems that shaped the early military patterns.

On 1 October 1939, Winston Churchill, first Lord of the Admiralty and soon to be the UK's wartime leader, described Russia as a riddle wrapped in a mystery inside an enigma. The same can certainly be said of Stalin. How can this paradox of a man who on the one hand had once exhibited great tenderness and kindness to his daughter Svetlana and on the other sent millions, including members of his own family, to their deaths be explained? It is impossible to quantify the total number of deaths attributable to the

policies of stalin but the excess mortality i.e. deaths over and above what would normally have been expected during the period in question gives an approximate figure in excess of 40 million however this is only part of the story of the amount of misery inflicted by the stalin regime through torture deliberate starvation neglect separation from loved ones cold and hypothermia e.g. in the prisons of siberia which is unquantifiable and unimaginable svetlana confessed that she would never undertake to explain what motivated all my father's actions simply because i do not possess the psychological genius of russian novelist dostoevsky who knew how to penetrate into another man's soul and examine it from within
