focusing on polarization matrix optics in many forms this book includes coverage of a wide range of methods which have been applied to lcd modeling ranging from the simple jones matrix method to elaborate and high accuracy algorithms suitable for off axis optics researchers and scientists are constantly striving for improved performance faster response times wide viewing angles improved colour in liquid crystal display development and with this comes the need to model lcd devices effectively the authors have significant experience in dealing with the problems related to the practical application of liquid crystals in particular their optical performance key features explores analytical solutions and approximations to important cases in the matrix treatment of different lc layer configurations and the application of these results to improve the computational method provides the analysis of accuracies of the different approaches discussed in the book explains the development of the eigenwave jones matrix method which offers a path to improved accuracy compared to jones matrix and extended jones matrix formalisms while achieving significant improvement in computational speed and versatility compared to full 4x4 matrix methods includes a companion website hosting the authors program library lmoptics fortran 90 a collection of routines for

calculating the optical characteristics of stratified media the use of which allows for the easy implementation of the methods described in this book the website also contains a set of sample programs source codes using Imoptics which exemplify the application of these methods in different situations

the evolution of portable communications applications has been facilitated largely by the development of reflective lcd technology offering a unique insight into state of the art display technologies reflective liquid crystal displays covers the basic operations principles exemplary device structures and fundamental material properties of device components display engineers scientists and technicians active in the field will welcome this unique resource as will developers of a wide range of systems and applications graduate students and researchers will appreciate the introduction and technical insight into this exciting technology featuring direct view projection and micro virtual projection reflective displays in the context of multi media projectors mobile internet and personal entertainment displays optimisation of critical display attributes fast response time low voltage operation and wide angle viewing description of the basic properties of liquid crystal materials and their incorporation into configurations for transmissive and reflective applications examination of the various operations modes enabling the reader to select the appropriate display type to meet a variety of needs overview and comparison of the complete range of reflective display technologies and reflective lcd effects the society for information display sid is an international society which has the aim of encouraging the development of all aspects of the field of information display complementary to the aims of the society the wiley sid series is intended to explain the latest developments in information display technology at a professional level the broad scope of the series addresses all facets of information displays from technical aspects through systems and prototypes to standards and ergonomics

kaneko s work in the best manner is filling a gap in the present literature and will be a standard reference source for all people interested in lcd s crystal research and technology 1988
