we wrote this book because our primary sense of who we are as professionals is that we are teachers we play various roles in our careers but we are especially dedicated to our students we want them to listen read create and evaluate more effectively as a result of their experience in a business law class above all we want them to sense the importance and excitement of the law we want them to be aware that business resides in an atmosphere of legal rights and responsibilities the more they have an understanding of relevant law the more their business activities will flourish we tried to construct a book that contains the basics of business law but does not get bogged down in the kind of details that would be more appropriate in an upper level law class this sixth edition continues and advances the pedagogical strengths of earlier editions as difficult as it is to recall what it is like to know almost nothing about business law we tried repeatedly to force ourselves to remember that the text is for students not for us to reveal our previous training toward that end we have simplified and clarified as often as we could
