Europe is a small continent and yet it became the dominant global power from the late 18th century while the continent appeared to become a global centre. It also experienced various fractures along constantly shifting state borders. These developments over the past 250 years have made European history especially dynamic and exciting. Modern Europe: A Transnational History explores the complexity of this continent by telling a history of transnational Europe, showing how it has been constantly reinvented and reconfigured by global and local connections and ruptures. The authors explain Europe not in terms of a collection of national histories but focuses on the numerous cross border flows of peoples, goods and ideas that cut across state boundaries. As this book shows, the peoples and societies of Europe can only be understood by painting a picture of connections and contestations created within empire, the national and the local.

This reader brings together original and influential recent work in the field of early modern European history, providing a thought-provoking overview of current thinking on this period. Key themes include evolving early modern identities, changes in religion and cultural life, the revolution of the mind, roles of women in early modern societies, the rise of the modern state and Europe and the New World system. During this change of mind it must have been that Canute the most powerful prince of his time, being sovereign of Denmark, Norway and England, put to the blush his flattering courtiers who exclaimed in admiration of his grandeur that every thing was possible for him. He ordered a chair to be brought and seated himself on the seashore while the tide was rising and as the waves approached he said in an imperious tone: 'Thou sea art under my dominion and the land upon which I sit is mine. I charge thee approach no farther nor dare to wet the feet of thy sovereign.' He even

sat some time in seeming expectation of submission but as the sea still advanced towards him and at last began to wash him with its billows he turned to his courtiers and observed that every creature in the universe is feeble and impotent and that power resides only with one being in whose hands are the elements of nature and who can say to the ocean thus far shalt thou go and no farther⁴ but although canute weary of worldly greatness began to turn his eyes towards a future state of existence the spirit which prevailed in that age unfortunately gave a false direction to his piety instead of making reparation to the persons whom he had injured by former acts of violence he built churches endowed monasteries and appointed prayers to be said for the souls of those who had fallen in battle against him and what was thought by many to be still more meritorious he undertook a pilgrimage to rome after his return from the continent he performed nothing memorable except an expedition against malco
