the congress's unique structure represents the two dimensions of technology and medicine 13 themes on science and medical technologies intersect with five challenging main topics of medicine to create a maximum of synergy and integration of aspects on research development and application each of the congress themes was chaired by two leading experts the themes address specific topics of medicine and technology that provide multiple and excellent opportunities for exchanges

the general theme of medicon 2013 is research and development of technology for sustainable healthcare this decade is being characterized by the appearance and use of emergent technologies under development this situation has produced a tremendous impact on medicine and biology from which it is expected an unparalleled evolution in these disciplines towards novel concept and practices the consequence will be a significant improvement in health care and well fare i.e. the shift from a reactive medicine to a preventive medicine this shift implies that the citizen will play an important role in the healthcare delivery process what requires a comprehensive and personalized assistance in this context society will meet emerging media incorporated to all objects capable of providing a seamless adaptive anticipatory unobtrusive and pervasive assistance the challenge will be to remove current barriers related to the lack of knowledge required to produce new opportunities for all the society while new paradigms are created for this inclusive society to be socially and economically sustainable and respectful with the environment in this way these proceedings focus on the convergence of biomedical engineering topics ranging from formalized theory through experimental science and technological development to practical clinical applications

this volume presents the 5th european conference of the international federation for medical and biological engineering embec held in budapest 14-18 september 2011 the scientific discussion on the conference and in this conference proceedings include the following issues signal image processing ict clinical engineering and applications biomechanics

and fluid biomechanics biomaterials and tissue repair innovations and nanotechnology modeling and simulation education and professional

concise yet comprehensive the biomedical technology and devices handbook illuminates the equipment devices and techniques used in modern medicine to diagnose treat and monitor human illnesses with topics ranging from the basic procedures like blood pressure measurement to cutting edge imaging equipment biological tests and genetic engineering this book is organized to navigate smoothly from simple procedures and concepts to the more sophisticated and complex ones each section contains a description of the technique its technical considerations and its use according to its applications and relevant body systems the book includes references to relevant sites protocols problems and solutions

this volume presents the proceedings of the joint conference of the european medical and biological engineering conference embec and the nordic baltic conference on biomedical engineering and medical physics nbc held in tampere finland in june 2017 the proceedings present all traditional biomedical engineering areas but also highlight new emerging fields such as tissue engineering bioinformatics biosensing neurotechnology additive manufacturing technologies for medicine and biology and bioimaging to name a few moreover it emphasizes the role of education translational research and commercialization

in the last few decades the research on bioelectromagnetics has expanded worldwide about one thousand researchers are now working in the field in a variety of institutions throughout the world including medical biological engineering and technical laboratories and protection agencies after many years of research a clear picture is now emerging initially the research was mainly interested in the therapeutic applications of elf electric and magnetic fields and the rf range was mainly taken into consideration with respect to thermal effects only then the growing body of biological effects of elf fields on cells and biological tissues particularly for the repair processes in bone have drawn the attention of researchers to non thermal effects ranging from static fields to microwaves a specific field of interest that has been

the object of a large debate in the last twenty years has been the potential health risk associated with electric power production and distribution and more recently with domestic and industrial appliances in the last few years the explosion of the market for cellularphones has highlighted the issue of possible health dangers related to their use and to the widespread presence of base stations the first world congress on electricity and magnetism in biology and medicine was held in orlando florida in 1992 and collected the widest amount of contributions from almost all the major researchers involved in the field

statistical mechanics and nonlinear physics are research areas that have developed a multidisciplinary character with many applications the scientific problems discussed in this volume include biological applications of statistical physics econophysics and sociologically related problems chaos and nonlinear dynamics pattern formation and spatio temporal complexity fluids and granular media q thermostatistics stochastic processes lasers and nonlinear optics synchronization wavelets and nonlinear time series analysis
