in this book his major work alfred schutz attempts to provide a sound philosophical basis for the sociological theories of max weber using a husserlian phenomenology schutz provides a complete and original analysis of human action and its intended meaning

social phenomenology brings together insights from the tradition of phenomenology and recent discussions of collective intentionality in doing so it offers a unique account of how consciousness is formative of the social world that is how our thinking things to be so can in some cases actually make them so for instance that the money one uses day in and day out is worth something is not because of its physical characteristics but because we accept that those physical traits printed by the right institutions make it so the book argues for a position between atomism and collectivism that is the book denies there is any such thing as collective consciousness while also denying the atomic conception of subjects which views subjects as islands unto themselves free of relation to others

phenomenological foundations the cognitive setting of the life world acting in the life world the world of social relationships realms of

experience the province of sociology

the term phenomenology has become almost as over used and emptied of meaning as that other word from continental philosophy namely existentialism yet husserl who first put forward the phenomenological method considered it a rigorous alternative to positivism and in the hands of merleau ponty a disciple of husserl in france phenomenology became a way of gaining a disciplined and coherent perspective on the world in which we live when this study originally published in 1977 there were only a few books in english on merleau ponty s philosophy it introduced the reader and suggested how his thought might throw light on some of the assumptions and presuppositions of certain contemporary forms of anglo saxon philosophy and social science it also demonstrates how phenomenology seeks to unite philosophy and social science rather than define them as mutually exclusive domains of knowledge

phenomenological accounts of sociality in husserl heidegger merleau ponty sartre scheler schutz stein and many others offer powerful lines of arguments to recast current predominantly analytic discussions on collective intentionality and social cognition against this background the aim of this volume is to reevaluate critically and in contemporary terms the rich phenomenological resources regarding social reality the interpersonal collective and communal aspects of the life world lebenswelt specifically the book pursues three interrelated objectives it aims 1 to systematically explore the key phenomenological aspects of social reality 2 to offer novel state of the art assessments of both central and lesser known proponents of the phenomenology of sociality gurwitsch 1 with von hildebrand or walther and 3 to contextualize this elaborate body of work in light of contemporary social cognition research the growing literature in analytic social ontology and current trends in moral psychology moral

phenomenology and social and political philosophy the collection brings together original articles by a host of prominent scholars and upcoming young talents to provide a comprehensive and up to date treatment of the topic it will be essential reading for those studying phenomenological accounts of intersubjectivity empathy and community including analytic social moral and political philosophers and will also be of interest for social scientists and social psychologists

the idea of this anthology is to explore the relationships between phenomenology and the social sciences

max van manen offers an extensive exploration of phenomenological traditions and methods for the human sciences it is his first comprehensive statement of phenomenological thought and research in over a decade phenomenology of practice refers to the meaning and practice of phenomenology in professional contexts such as psychology education and health care as well as to the practice of phenomenological methods in contexts of everyday living van manen presents a detailed description of key phenomenological ideas as they have evolved over the past century he then thoughtfully works through the methodological issues of phenomenological reflection empirical methods and writing that a phenomenology of practice offers to the researcher van manen s comprehensive work will be of great interest to all concerned with the interrelationship between being and acting in human sciences research and in everyday life max van manen is the editor of the series phenomenology of practice routledge com series ppvm

phenomenology is the main philosophy of the 20th century now passed on to a new generation to restore its authentic vision this title proposes a return to its foundational source in husserl s project of a universal science unpacking all its creative capacities

alfred schutz was born in vienna on april 13 1899 and died in new york city on may 20 1959 the year 1969 then marks the seventieth anniversary of his birth and the tenth year of his death the essays which follow are offered not only as a tribute to an irreplaceable friend colleague and teacher but as evidence of the contributors conviction of the eminence of his work no special pleading is needed here to support that claim for it

is widely acknowledged that his ideas have had a significant impact on present day philosophy and phenomenology of the social sciences in place of either argument or evaluation i choose to restrict myself to some bi graphical information and a fragmentary memoir the only child of johanna and otto schutz an executive in a private bank in vienna alfred attended the esterhazy gymnasium in vienna an academic high school whose curriculum included eight years of latin and greek he graduated at seventeen in time to spend one year of service in the austrian army in the first world war for bravery at the front on the battlefield in italy he was decorated by his country after the war ended he entered the university of vienna completing a four year curriculum in only two and one half years and receiving his doctorate in law

this book shows how phenomenology of the social sciences differs from positivistic approaches and presents schutz s theory of relevances a key feature of his own phenomenology of the social world it begins with schutz s appraisal of how husserl influenced him and continues with exchanges between schutz and eric voegelin felix kaufmann aron gurwitsch and talcott parsons this book presents for the first time schutz s incisive criticisms of t s eliot s theory of culture

in this commentary john o neill concentrates upon three themes in the goal merleau ponty set for himself namely to restore to things their concrete physiognomy to organisms their individual ways of dealing with the world and to subjectivity its inherence in history o neill considers the three objectives in their original order first the study of animal and human psychology then the phenomenology of perception and finally certain extensions of these perspectives in the historical and social sciences

what does it mean to be a social being in the ordinary life world this clear and compelling introduction to social phenomenology examines the experiential features of the basic things comprising our life world namely me you abstract others enemies communities and associations and attributes of the lived body emotions pain and pleasure each of these entities is phenomenologically described with the aim of reducing reports of personal experiences and other primary documents to the presumed prototypical experience of the thing in question its ideal essence another aim of this study is to sociologically account for how the various entities of the life world have been accomplished that is how the prototypical experiences of the things in question have come to be by showing the life world to be our joint project rather than a fixed unalterable coherency this volume destabilizes our naive attitude towards the things of the world examples are drawn from the author s own research on issues such as violence religion health and race from classic and contemporary anthropological research and from the works of some of the most innovative philosophers of the twentieth century this study actually does phenomenology instead of merely arguing for its necessity and will appeal to both social scientists and philosophers

this monograph examines an academic discipline in crisis the author claims that this field concerned with society and relationships is in trouble no one can seem to agree on what it does or how to go about doing it his insightful argument revives the thought of key phenomenologists often no longer considered in social science looking predominantly at debates within religious studies this book uncovers certain misguided presuppositions which have strongly influenced scholars in the field this reflects itself in a weberian ideal regarding the institutional place of science in the universities and a failure to properly consider the epistemic status of knowledge produced for its own sake but even recognizing

these issues will not get to the core of the crisis it will not help scholars better understand what it is to be human to address this the author digs deeper he draws on the philosophical phenomenology of husserl s phenomenological movement to critique our very idea of social science in the process he presents a radical approach to the question of humanity this volume concludes that properly understood social science is a hobby it deserves no special place in the university indeed if it is to be pursued properly it requires a fundamentally revised understanding of humanity the author argues this not of the sake of controversy rather his intention is to affect the necessary shift in our understanding that will enable future constructive solutions

examines the lived experience of social encounters drawing on phenomenological insights

phenomenology of civilization explores the philosophy of edmund husserl and r g collingwood two of the most influential philosophers of the twentieth century husserl founded phenomenology which has had a direct effect on contemporary philosophy and collingwood though less formally known is still one of the most commonly read twentieth century philosophers maurice eisenstein examines their work in relation to recent philosophy particularly focusing on existentialism heideggerian phenomenology and postmodernism he brings these two philosophers together because they were contemporaries of each other addressed the same audience and therefore had similar issues to influence them this discussion of husserl and collingwood s work moves beyond husserl s phenomenology and collingwood s typical association with hegel or kant to a new understanding of their ideas through an association with each other in regard to contemporary philosophy and political theory eisenstein s discoveries place husserl and collingwood into the main western liberal political tradition with dewey and james rather than the more radical

critique of that tradition with sartre and heidegger

this book fully discusses schutz s account of social reality and theory of motivation including how his phenomenology casts the marxian sociology of knowledge in a new light
