teachers cannot teach what they do not know this country has tolerated a weak licensing system for prospective teachers for decades this weak system has been accompanied by an increasingly emptier curriculum for most students depriving them of the knowledge and skills needed for self government an empty curriculum how teacher licensure tests lead to empty student minds makes the case that the complete revision of the licensing system for prospective and veteran teachers in massachusetts in 2000 and the construction of new or more demanding teacher licensing tests contributed significantly to the massachusetts education miracle that miracle consisted of enduring gains in achievement for students in all demographic groups and in all regional vocational technical high schools since 2005 gains confirmed by tests independent of massachusetts policy makers the immediate purpose of this book is to explain what

massachusetts did in 2000 to strengthen its teacher licensing and re licensing system to ensure that all teachers could teach to relatively strong k 12 standards its larger purpose is to suggest that development of strong academic standards in all major subjects should be followed by complete revision of a state s teacher licensing system not as has been the case for several decades the development of k 12 student tests if this country wants to strengthen public education

one of the areas of study students find most difficult to master and are most fearful of is math yet the core math skills acquired in the first four years of school form the basis of all future academic success get ready for standardized tests the first and only grade specific test prep series now features hands on guidance on helping kids master the all important basic math skills while arming parents with the tools they need to help their children succeed

deindustrialization white flight and inner city poverty have spelled trouble for baltimore schools marion orr now examines why school reform has been difficult to achieve there revealing the struggles of civic leaders and the limitations placed on baltimore s african american community as each has tried to rescue a failing school system examining the interplay between government and society orr presents the first systematic analysis of social capital both within the african american community black social capital and outside it where social capital crosses racial lines orr shows that while black social capital may have created solidarity against white domination in baltimore it hampered african american leaders capacity to enlist the cooperation from white corporate elites and suburban residents needed for school reform orr examines social capital at the neighborhood level in elite level interactions and in intergovernmental relations to argue that black social capital doesn t necessarily translate into the kind of intergroup coalition needed

to bring about school reform he also includes an extensive historical survey of the black community showing how distrust engendered by past black experiences has hampered the formation of significant intergroup social capital the book features case studies of school reform activity including the first analysis of the politics surrounding Baltimore's decision to hire a private for profit firm to operate nine of its public schools these cases illuminate the paradoxical aspects of black social capital in citywide school reform while offering critical perspectives on current debates about privatization site based management and other reform alternatives Orr's book challenges those who argue that social capital alone can solve fundamentally political problems by purely social means and questions the efficacy of either privatization or black community power to reform urban schools black social capital offers a cogent conceptual synthesis of social capital theory and urban regime theory that demonstrates the importance of government politics and leadership in converting social capital into a resource that can be mobilized for effective social change
