the publication presents an overview of the economies on a country by country basis of the latin america and the caribbean region

during the 1990s countries in the latin american and caribbean region regained access to external finance from international capital markets for the development of their economies however the volatility of these sources of finance and the region s pro cyclical macroeconomic policies have been reflected in unusually frequent financial crises and unstable economic growth this publication proposes a strategy for growth for the region based on three key aspects of promoting stability of international capital flows for development financing trade linkages and access to external capital and promoting national capital resources by boosting public and private saving and investment

the numisheet conferences occur once every three years alternating in location between north america europe and asia the conference attracts international participation from the metal forming industry and university professors interested in sheet metal forming technology with a strong emphasis on forming simulation although the conference is dominated by the automotive industry the conference has a wider appeal drawing contributions from the aircraft and canning industries as well the numisheet conference proceedings include the latest developments in metal forming technology which is a rapidly growing and challenging opportunity for application of science to industry the developments are described in over 125 papers included in part a of the proceedings in addition this volume includes the numisheet keynote program which focused on cutting areas of technology and was presented by selected leading scientists in the field of metal forming one of the hallmarks of the conference is the numisheet benchmark study which is a set of three blind tests prepared one year prior to the conference participants are invited to submit their predictions of how selected types of sheet metal will deform under large plastic deformation during the manufacture of actual automotive products and laboratory test specimens the complete specifications and results of this blind test are described in part b of the proceedings

international relations and scientific progress argues that a theory focusing on the structure of the international system may explain a wider and more interesting range of events in world politics than other alternatives the first part of the book assesses the meaning of progress in the discipline of international relations a process that culminates in the creation of a new concept the scientific research enterprise the second part review structural realism within that context and makes the case for an elaboration of structural realism by showing that a system level theory based on structure could have great unrealized explanatory potential the third part explores new directions most notably as related to empirical testing of an elaborated version of structural realism that focuses on both continuity and change in the international system patrick james is professor of political science at the university of missouri
