if resources for hiv prevention efforts were truly unlimited then this book would be entirely unnecessary in a world with limitless support for hiv prevention activities one would simply implement all effective or potentially effective programs without regard to expense we would do everything useful to prevent the further spread of the virus that has already claimed hundreds of thousands of lives in the united states and millions of lives worldwide unfortunately funding for hiv prevention programs is limited even

though the amount of available funding may seem quite large especially in the united states it is still fixed and not sufficient to meet all needs for such programs this was very well illustrated in the summer of 1997 when over 500 community based organizations applied for a combined total of 18 million of hiv prevention funding from the u s centers for disease control and prevention cdc less than one fifth of these organizations received support via this funding mechanism hence although 18 million may seem like a large amount of money at first blush it is not enough to meet all of the prevention needs that could be addressed by these community based organizations
