scientific essay from the year 2009 in the subject business economics economic policy university of edinburgh school of law course economics and policy of european integration language english abstract part i of this paper will illustrate that although the currency union signified the next significant step along the european integration ladder that was built already back in 1958 it must be recognised that the single market is not yet fully established in europe hence the phrasing of the title question suggests the reading of whether or not the single currency is absolutely necessary for the completion of the single market part ii is dedicated to the central aim of this paper namely to assess to what extent the common currency furthers or indeed counteracts the achievement of the fundamental single market objective while this essay goes to lengths in highlighting the desirability of the single currency and its many benefits that help further the achievement of the single market it does however maintain that the currency union is not absolutely necessary for the establishment of the

common market indeed as has been noted it is possible to have a single market without a single currency furthermore as will be shown in the forthcoming sections of part ii there are even situations in which the single currency might be harmful to the single market and to the union although the answer to the title question of whether a single currency is really required must necessarily be in the negative since the single market could potentially exist without the euro this essay will conduct an extensive evaluation of the successes and failures of the euro and the economic and monetary union emu to further the single market objective in order to illustrate that the euro has nonetheless both enabled it to function much more efficiently and helped to bring european economic and political integration to previously unknown levels in this sense the single market

recoge 1 introduction 2 international relations regionalisation and globalisation 3 euro japanese relations contex themes and units of analysis 4 european integration and japanese investment 5 eu member states and japanese investment 6 eu sub state regions and japanese investment 7 a counter factual case eu japan trade in the absence of significant direct investment 8 conclusions

the integration of the central and eastern european transition countries into the european union is one of the most exciting economic policy issues of today the book provides a detailed analysis of the economic effects which eu integration has on accession countries it shows that these countries have already managed to fully remove the anti trade bias with the eu that existed before the fall of the iron curtain benefits from further integration into the eu could result in particular from the fact that full membership in the european community will increase the credibility of government policy in accession countries the study explores in depth how these credibility effects can be quantified the author develops a novel approach to model the transformation process within a dynamic computable general equilibrium framework furthermore he estimates the potential income and welfare effects of eu integration for poland the largest transition country with eu candidate status
