Scarcity

The fundamental economic problem: Resources (land, labor, capital) are limited, while human desires are boundless. This necessitates choices and tradeoffs. Supply and Demand

The cornerstone of market economics. Supply represents the quantity producers are willing to offer at various prices, while demand reflects consumer willingness to buy at those prices. The intersection of supply and demand determines the market equilibrium price and quantity. The recent surge in energy prices, for example, is a direct result of disruptions in supply chains and increased demand.
