the analysis of the distributional impact of policy reforms on the well being or welfare of different stakeholder groups particularly on the poor and vulnerable has an important role in the elaboration and implementation of poverty reduction strategies in developing countries in recent years this type of work has been labeled as poverty and social impact analysis psia and is increasingly implemented to promote evidence based policy choices and foster debate on policy reform options while information is available on the general approach techniques and tools for distributional analysis each sector displays a series of specific characteristics these have implications for the analysis of distributional impacts including the types of impacts and transmission channels that warrant particular attention the tools and techniques most appropriate the data source typically utilized and the range of political economy factors most likely to affect the reform process this volume provides an overview of the specific issues arising in the analysis of the distributional impacts of policy and institutional reforms in selected sectors each chapter offers guidance on the selection of tools and techniques most adapted to the reforms under scrutiny and offers examples of applications of these approaches this is a companion to the first volume which offers guidance on trade monetary and exchange rate policy utility provision agricultural markets land policy and education

silicon carbide sic gallium nitride gan and diamond are examples of wide bandgap semiconductors having chemical electrical and optical properties which make them very attractive for the fabrication of high power and high frequency electronic devices as well as of light emitters and sensors which have to operate under harsh conditions the book comprises the proceedings of the 5th edition of the european conference on silicon carbide and related materials held from the 31st august to the 4th september 2004 in bologna italy this conference series here continued its tradition of being the main european forum for exchanging results and discussing progress between those university and industry researchers who are most active in the fields of sic and related materials attendees at the conference highlighted the progress made in material growth technology characterization of material properties and technological processing for electronic applications many electronics devices were presented including high voltage high power density and high temperature components as well as microwave components radiation hard sensors were also presented these proceedings fully document the latest experimental and theoretical understanding of the growth of bulk and epitaxial layers the properties of the resultant materials the development of suitable processes and of electronic devices that can best exploit and benefit from the outstanding physical properties that are offered by wide bandgap materials

healthcare for all at affordable prices is still a major but universally elusive goal everyone spends money on healthcare and it is the most impoverishing consumption item thus most governments and the united nations promote universal health coverage each country's unique blend of tools for healthcare

financing including taxes subsidies and market controls most people in low and middle income countries lmics have no health insurance of any kind and most lmic governments lack the political will information or resources to require their citizens to buy health insurance themselves or to subsidize insurance for all who cannot afford the price this book deals with financing voluntary and contributory health insurance for resource poor and rural groups in lmics this book addresses three issues the first is how to catalyse demand for health insurance and develop insurance literacy among the largely illiterate and innumerate target population using training programs to build an enabling consensus allowing locals to create and administer such schemes the second involves the process of developing simplified methods for risk assessment which can help to underwrite risks price the micro health insurance schemes and ensure proper implementation the third issue is formulating a compelling business case which would make this health insurance affordable financially sustainable and operationally scalable this book develops insurance education and financial literacy for students of economics business administration insurance development studies and social work to prepare them for practical work as implementers policymakers or evaluators a supplementary section for teachers and students includes comprehension questions

this springer handbook comprehensively covers the topic of semiconductor devices embracing all aspects from theoretical background to fabrication modeling and applications nearly 100 leading scientists from industry and academia were selected to write the handbook s chapters which were conceived for professionals and practitioners material scientists physicists and electrical engineers working at universities industrial r d and manufacturers starting from the description of the relevant technological aspects and fabrication steps the handbook proceeds with a section fully devoted to the main conventional semiconductor devices like e g bipolar transistors and mos capacitors and transistors used in the production of the standard integrated circuits and the corresponding physical models in the subsequent chapters the scaling issues of the semiconductor device technology are addressed followed by the description of novel concept based semiconductor devices the last section illustrates the numerical simulation methods ranging from the fabrication processes to the device performances each chapter is self contained and refers to related topics treated in other chapters when necessary so that the reader interested in a specific subject can easily identify a personal reading path through the vast contents of the handbook
