presents managers with models for success via explicit examples of management innovation this book provides context with examples of key business innovations

master s thesis from the year 2021 in the subject business economics market research grade 1 0 accadis hochschule bad homburg language english abstract mobile payment systems are an innovation that allows people to make contactless payments with a mobile device such as a smartphone at the cash register in brick and mortar retail outlets without carrying a wallet with credit and debit cards while other countries have almost entirely adopted and integrated this innovation into their daily lives adoption rates in germany remain significantly low hence the objective of this work is to analyze the future of mobile payment systems in germany with respect to the

reasons for adoption or refusal in particular the following research question was addressed will mobile payment methods replace physical cards in germany or will certain factors prevent full adoption

as recently as the summer of 2001 many travelers were dreading air transportation because of extensive delays associated with undercapacity of the system that all changed on 9 11 and demand for air transportation has not yet returned to peak levels most u s airlines continue to struggle for survival and some have filed for bankruptcy the situation makes it difficult to argue that strong action is urgently needed to avert a crisis of undercapacity in the air transportation system this report assesses the visions and goals for u s civil aviation and technology goals for the year 2050

this volume comprises the papers and debates of the second france ilo symposium on the future of work employment and social protection reflecting the aim of the symposium itself the book provides in depth reflections on work employment and social protection designed to be more than an account of the discussions this book is a useful tool for all those interested in labour market transition and the increasing importance of female labour for the future of the labour markets particularly in the developed world the book discusses the need for more family friendly policies and a more radical policy of equality between the sexes the legal dimensions of labour market change are also debated and the book explores the positive and negative sides of globalization and its links with technological change

a fascinating look at the cutting edge science and technologies that are on the cusp of changing everything from where we ll live how we ll look and who we ll be by the popular science broadcaster and bestselling author jay ingram where will we live how will we get around what will we look like these are just some of the questions bestselling author and popular science broadcaster jay ingram answers in this exciting examination of the science and technologies that will affect every aspect of human life in these pages ingram explores the future of our technological civilization he reports on cutting edge research in organ and limb regeneration advances in prosthetics the merging of the human and the synthetic and gene editing vertical farming and lab grown food might help feed millions and alleviate pressure on the planet cities could accommodate green space and the long awaited flying car finally he speculates on the future of artificial general intelligence even artificial superintelligence as well as our place on earth and in the universe the potential impact of these developments in science and technology will be powerful and wide ranging complicated by ethics and social equity and they will inevitably revolutionize every aspect of life and even who we are this is the future of us

contemporary futurist thought describes recent thinking about the future dealing with both the hopes and the fears expressed in modern times concerning what potentially lies ahead there are many such hopes and fears perhaps an overpowering number competing with each other and swirling about in the collective mind of humanity psychologist and futurist tom lombardo describes this mental universe of inspiring dreams and threatening premonitions regarding the future the book begins with an in depth examination of the highly influential literary genre of science fiction which dr lombardo identifies as the mythology of the future he next describes the modern academic discipline of future studies which attempts to apply scientific methods and principles to an understanding of the future social and

technological trends in the twentieth century are then reviewed setting the stage for an analysis of the great contemporary transformation occurring in our present world given the powerful and pervasive changes taking place across the globe and throughout all aspects of human life the questions arise where are we potentially heading and perhaps more importantly where should we be heading the final chapter provides an extensive review of different answers to these questions describing theories and approaches that highlight science technology culture human psychology and religion among other areas of focus as well as integrative views which attempt to provide big pictures of all aspects of human life the book provides a rich and broad overview of contemporary ideas and visions about the future in the conclusion dr lombardo assesses and synthesizes these myriad perspectives proposing a set of key ideas central to understanding the future this book completes the study of future consciousness begun in its companion volume the evolution of future consciousness these two volumes rich in historical detail and concise observations on the interrelatedness of a wide range of interdisciplinary topics are a significant contribution to the field of future studies and a valuable resource for educators consultants and anyone wishing to explore the significance of thinking about the future

thinking about the future is essential for almost all organizations and societies states corporations universities cities ngos and individuals believe they cannot miss the future but what exactly is the future it remains a mystery perhaps the greatest mystery especially because futures are unpredictable and often unknowable the outcome of many factors known and unknown the future is rarely a simple extrapolation from the present in this important book john urry seeks to capture the many efforts that have been made to anticipate visualize and elaborate the future this includes examining the methods used to model the future from those of the rand corporation to imagined future worlds in philosophy literature art film tv and computer games he shows that futures are often contested and saturated with different interests especially in relation to future generations he also shows how analyses of social institutions practices and lives should be central to examining potential futures and issues such as who owns the future the future seems to be characterized by wicked problems there are multiple causes and solutions long term lock ins and complex interdependencies and different social groups have radically different frames for understanding what is at stake urry explores these issues through case studies of 3d printing and the future of manufacturing mobilities in the city and the futures of energy and climate change

the future of business explores how the commercial world is being transformed by the complex interplay between social economic and political shifts disruptive ideas bold strategies and breakthroughs in science and technology over 60 contributors from 21 countries explore how the business landscape will be reshaped by factors as diverse as the modification of the human brain and body 3d printing alternative energy sources the reinvention of government new business models artificial intelligence blockchain technology and the potential emergence of the star trek economy

from the man the wall street journal describes as a global change guru more than one hundred of the trends that touch every aspect of our lives this new and updated edition looks even farther into the future predicting trends past the first decades of the 22nd century patrick dixon looks at how the future will be fast urban tribal universal radical and ethical a future of boom and bust and great economic change

as the emerging markets grow up a future of great advances in medicine and also greater threats from viral epidemics a future of political shocks and greater conflicts a future in which people will strive for more privacy and businesses will change the way they relate to their staff and their customers a future in which there will be driverless cars and solar power generated in the desert will power cities thousands of miles away in this updated edition dixon shows how recent developments confirm his predictive scheme artificial intelligence and robotics profound power and influence over our future world beyond brexit the longer term future of the eu and uk the long term impact of the metoo movement the future of truth fake news propaganda and impact on democracy presidential leadership rise of powerful figureheads across the world and potential future conflicts and in an entirely new chapter dixon extends his predictive horizon to see how the future will look one hundred years from now

hurricane katrina the internet stock bubble disease outbreaks are these predictable preventable events or are we merely the playthings of chaos a compelling irreverent elegantly written history of our future that addresses the most important issues of our time apollo s arrow examines such questions as how well can we predict the future can past discoveries help us understand tomorrow s weather patterns or tell us what our financial future will look like will scientists ever be able to forecast catastrophes or will we always be at the mercy of mother nature waiting for the next storm epidemic or economic crash to thunder through our lives david orrell looks back to show us how past scientists and some charlatans predicted the future and where we are on the path to truly understanding what comes next he asks how today s scientists can claim to predict future climate events when even three day forecasts prove a serious challenge can we predict and control epidemics can we accurately foresee our financial future or will we only find out about tomorrow when tomorrow arrives

what does the future hold how will we live work and entertain ourselves what new technologies will emerge will humanity evolve and perhaps live forever or are we facing threats that could end us and even the whole universe the future in minutes tackles these and many other fundamental questions concisely and lucidly explaining everything from cryptocurrencies and world governments to gene therapy and colonizing planets and painting our options for utopia or disaster contents include predicting the future how we ll live shifts in society technology of the future scarcity and solutions politics warfare and ethics the quest for immortality transhumans and posthumans artificial intelligence threats to humanity space travel and colonization super advanced science and the fate of the earth and the universe

how the future has been imagined and made through the work of writers artists inventors and designers the future is like an unwritten book it is not something we see in a crystal ball or can only hope to predict like the weather in this volume of the mit press s essential knowledge series nick montfort argues that the future is something to be made not predicted montfort offers what he considers essential knowledge about the future as seen in the work of writers artists inventors and designers mainly in western culture who developed and described the core components of the futures they envisioned montfort s approach is not that of futurology or scenario planning instead he reports on the work of making the future the thinkers who devoted themselves to writing pages in the unwritten book douglas engelbart alan kay and ted nelson didn t predict the future of computing for instance they were three of the people who made it montfort

focuses on how the development of technologies with an emphasis on digital technologies has been bound up with ideas about the future readers learn about kitchens of the future and the vision behind them literary utopias from plato s republic to edward bellamy s looking backward and charlotte perkins gilman s herland the futurama exhibit at the 1939 new york world s fair and what led up to tim berners lee s invention of the world wide montfort describes the notebook computer as a human centered alterative to the idea of the computer as a room sized giant brain speculative practice in design and science fiction and throughout the best ways to imagine and build the future
