this monograph studies stative predicates from a neo constructionist perspective and integrates them in a comprehensive theory of event and argument structure it focuses on two sets of stative verbs govern type verbs and object experiencer psychological verbs for govern verbs it shows how notions such as causativity and resultativity can also be ingredients of stative predicates and be derived syntactically the consequences of this proposal are further pursued in a crosslinguistic

investigation of adjectival passives which are stative predicates of sorts for object experiencer psychological verbs it is shown that their experiencer theta role can and should be derived as an aspectual entailment mediated by prepositional structure in defending this view this monograph reveals a syntactic parallelism between location verbs and object experiencer psychological verbs in many languages that has hitherto gone unnoticed this book will primarily appeal to researchers interested in lexical aspect and its connection to morphosyntax
