L'autore propone un metodo scientifico utile ai docenti per misurare con precisione le capacità di apprendimento di ogni studente e la quantità dei contenuti che ha imparato assegnando ai due aspetti di valutazione un valore oggettivo partendo dall'esperienza di applicazione del metodo ai bambini in età scolare. L'autore dimostra come esso possa essere applicato anche a studenti delle università. Il testo è diviso in due parti: nella prima è illustrato il lavoro preliminare di ricerca seguito da un'esposizione più specifica del metodo e dei suoi principi teorici; la seconda parte ha un contenuto pratico nella quale sono indicati i criteri di valutazione dei test suddivisi nelle principali materie all'epoca studiate nei college americani. L'opera è il risultato del lavoro di ricerca sperimentale condotto dall'autore grazie al quale ha conseguito il suo secondo titolo accademico presso l'università della Columbia nel 1922.
