feb 14 2012 multiple if s means your code would go and check all the if conditions where as in case of elif if one if condition satisfies it would not check other conditions

i just started python programming and i m wondering about the elif keyword other programming languages i ve used before use else if does anyone have an idea why the python developers added

apr 1 2014 that s where elif comes in handy to prevent such thing from happening which is the primary benefit of using it the other secondary good benefit of using elif instead of multiple if s is to

assuming the invalid syntax is a typo the big benefit of elif vs having an else statement with a nested if is indentation each time you go into a nested if you ll need to indent again which will destroy

```
if elif if elif true if elif elifelse
```

elif seems to have originated with the c preprocessor which used elif long before python afaict obviously in that context having a single token directive is valuable since parsing else if code

nov 26 2016 2 o if serve para verificar uma condição e o elif serve para verificar outra condição caso a

condição do if seja falsa no código não há muita diferença o elif vai garantir que aquela condição

mar 28 2023 python if elif else if if
if if if

according to the official python tutorial only one block of an if elif else structure will be executed your current if if if construct will evaluate all possibilities and execute any that are true

```

    elif if  else if  if  else if  if
    elif

```
