this book is designed to meet the continued need to re learn the principles of treatment of complex war injuries to the extremities in order to minimize post traumatic and post treatment complications and optimize functional recovery most of the chapters are based on the unique experience gained in the treatment of military personnel who have suffered modern combat trauma and civilian victims of terror attacks at a single large level 1 trauma center the remaining chapters present the experience of leading international authorities in trauma and reconstructive surgery a staged treatment protocol is presented ranging from primary damage control through to definitive functional limb reconstruction the organization of medical aid anesthesiology diagnostic imaging infection prophylaxis and

management of complications are reviewed and a special chapter is devoted to the challenging dilemma of limb salvage versus amputation in the treatment of limbs at risk

the need for greater international collaboration is becoming increasingly clear practically every nation or people has in addition to its own characteristics and history its own medical tradition methods and ways of thinking that are successfully established in one place may not be accepted in another for some time the medical tradition and training in different countries can take quite different forms what would our present knowledge be without the creative spontaneous ideas and contributions from the romance countries without the opportunity of research as it is practised on a large scale in the usa where so many young europeans took their first steps in experimental science without the conscientious clinical work done in central europe and the valuable experience gained there without finally the sober and critical scientific approach as fostered in the cool heads of northern europe for generations none of these qualities is sufficient without the others but together they are a source of strength ultimately we hope through sensible concentration of efforts while maintaining variety to overcome the lack of an integrated approach in experimental science and to prevent repetition of painful mistakes in this regard the first two eska congresses have brought us great advances
