i am delighted to be asked to write the foreword for management and practice in emergency nursing more than any other nursing speciality accident and emergency work reflects change in society because it is the casualties of social upheaval imbalance and inequality that you face every day here unfortunately a and e staff are confronted on a regular basis with child abuse family violence the result of terrorist activities social violence motor car accidents personal loss of loved ones the frustrations and aggression of life sometimes though some pleasant and funny episodes do occur but all too infrequently to become the norm my own experience of a and e nursing is very limited in fact it goes back to the days of the department being linked with orthopaedics and being called casualty it could though appear that in this day and age the wheel is turning full circle and moves have been made in the last reorganization to link the two new distinct specialities again this proposal was met with lots of protest from a and e staff which appears to have been defused the arguments stemmed mainly from the fact that orthopaedics and a and e are two quite difficult specialities of care and skills and as such must be seen as autonomous

from the award winning authors of fast facts for the triage nurse the vital information you need to quickly identify acutely ill or injured patients rapid access guide for triage and emergency nurses chief complaints with high risk presentations is the first pocket sized clinical manual focusing on patient driven chief complaints designed to assist in rapidly recognizing potential life threatening or life altering conditions this guide can be used in a variety of healthcare settings content covers each body system and its most common chief complaints along with first line questions assessments and interventions to prompt the user red flag findings easily identified by the flag icon denote critical signs and symptoms while a light bulb icon helps the user locate key tips the guide includes evidence based practice guidelines reference tables and checklists for at a glance retrieval of information most chapters contain space for taking notes inscribing important phone numbers or pasting facility specific policies and procedures key features common chief complaints with essential tips unique patient presentations triage processes clinical red flags screening tools pediatric and older adult considerations disaster response active shooter or violent situation action steps
