this book provides a practical guide to emgu cv libraries with sample code and examples used throughout to explain the concepts clearly each chapter deals with a different aspect of the computer vision field and the implementation of that topic in emgu cv if you are a c programmer working on computer vision projects this book is for you you should have prior experience with c

this book is intended for c developers who want to learn how to implement the main techniques of opencv and get started with it quickly working experience with computer vision image processing is expected

the 11th intelligent systems conference intellisys 2025 held in amsterdam the netherlands from 28 29 august 2025 brought together researchers practitioners and experts from around the world to share advancements in intelligent technologies conducted in a hybrid format the conference facilitated global collaboration and participation this volume presents a curated selection of 169 peer reviewed papers from a total of 470 submissions covering key areas such as artificial intelligence computer vision robotics and intelligent systems the contributions reflect the latest research trends practical applications and emerging challenges in these domains we hope that these proceedings serve as a valuable resource for researchers practitioners and students and that they inspire future work and collaborations in the field of intelligent systems

this book presents papers from the first international conference on smart vehicular technology transportation communication and applications vtca 2017 held from 6 to 8 november 2017 in kaohsiung taiwan the conference was co sponsored by springer fujian university of technology in china fujian provincial key laboratory of digital equipment fujian provincial key lab of big data mining and applications and national kaohsiung university of applied sciences in taiwan the book is a valuable resource for researchers and professionals engaged in all areas of smart vehicular technology vehicular transportation vehicular communication and applications

this volume constitutes selected papers presented at the 28th international conference on systems signals and image processing iwSSIP 2021 held in bratislava slovakia in june 2021 due to the covid 19 pandemic the conference was held online the presented 14 full and 5 short papers were thoroughly reviewed and selected from the 76 submissions the papers focus on various aspects of advanced signal processing in different scientific areas including filter design fourier and other transforms feature extraction machine learning and system adaptation to user oriented products like 5g networks iot virtual teleport or tele surgery operations

cybersecurity has gained in awareness and media coverage in the last decade not a single week passes without a major security incident that affects a company sector or governmental agencies this proceedings of the international conference on applied cybersecurity 2021 acs21 held in dubai on 13 and 14 november contains thirteen original contributions more than half of the contributions are about applications of machine learning to accomplish several cybersecurity tasks such as malware phishing email detection and botnet detection this was consistent with the current research and market trends we divided this book into two parts the first is focused on machine learning applications to cybersecurity whereas the second groups the other approaches this book is suitable for cybersecurity researchers and practitioners as well as fresh graduates it is also suitable for artificial intelligence researchers interested in exploring applications in cybersecurity

this text provides optional computer analysis exercises in selected examples troubleshooting sections applications assignments it uses frank explanations limits maths to only what is needed for understanding electric circuits fundamentals
