in 1996 the international court of justice delivered an advisory opinion on the legality of the use of nuclear weapons in which the court stated that while the existing international law relating to the protection and safeguarding of the environment does not specifically prohibit the use of nuclear weapons it indicates important environmental factors that are properly to be taken into account in the context of the implementation of the principles and rules of the law applicable in armed conflict the present work analyses this conclusion focusing on the question whether or not the use of nuclear weapons during international armed conflict would violate existing norms of public international law relating to the protection and safeguarding of the environment although the use of weaponry during armed conflict is usually related to the protection of individuals the rapidly emerging appreciation of and the worldwide realization of the intrinsic value of the natural environment as an indispensable asset for the continuation of life including human life on this planet both for present and future generations warrants a thorough and extensive examination of the question of the il legality of the employment of nuclear weapons from the point of view of international environmental protection law the book consists of two parts part i discusses the historical development and the effects of nuclear weapons part ii discusses the protection of the environment during international armed conflict under ius in bello ius ad bellum and ius pacis only then is it possible to assess the legality of the use of nuclear weapons under this particular set of rules

don't send your kids off to college without this book especially if they will be engaged in the sciences or philosophy the design of science evolution the environment and redemption will clarify the differences scientific basis and logical foundation for the two most dominating and competing worldviews we have adopted in western society nowadays namely science and religion after reading this book you will be able to better understand articulate and defend what you believe and why as a society in general we need to understand the basis of our morality and culture and how science and religion each have a role to play just a few of the types of questions answered are is there really competition and conflict between science and religion what is the technological and philosophical scope of science how does our worldview affect the development of morality and virtue both individually and collectively do we really need to be concerned about global environmental changes which type of worldview does the best job of providing answers to the tough questions on origin purpose environmental issues morality government and eternity is a belief in god and the bible part of the evolutionary process written by a mechanical engineer with more than thirty years of design and r d experience the design of science evolution the environment and redemption lays out in a clear concise easy to read and entertaining manner much of the science logic and data used by academia and the media to answer life's toughest questions as compared to the biblical judeo christian tradition this book explores how we can measure the truthfulness accuracy and scope of these worldviews and how they can affect us personally spiritually and culturally the answers are logically spiritually and technically robust as well as just plain surprising in many ways

this preface tells the story of how multimodal usability responds to a special challenge chapter 1 describes the goals and structure of this book the idea of describing how to make multimodal computer systems usable arose in the european network of excellence similar taskforce for cre ing human machine interfaces similar to human human communication 2003 2007 similar cc similar brought together people from multimodal signal processing and usability with the aim of creating enabling technologies for new kinds of multimodal systems and demonstrating results in research prototypes most of our colleagues in the network were in fact busy extracting features and guring out how to demonstrate progress in working interactive systems while claiming not to have too much of a notion of usability in system development and evaluation it was proposed that the authors support the usability of the many multimodal pro types underway by researching and presenting a methodology for building usable multimodal systems we accepted the challenge rst and foremost no doubt because the formidable team spirit in similar could make people accept outrageous things second h ing worked for nearly two decades on making multimodal systems usable we were curious curious at the opportunity to try to understand what happens to traditional usability work that is work in human computer interaction centred around tra tional graphical user interfaces guis when systems become as multimodal and as advanced in other ways as those we build in research today

as the construction industry continues to develop within the natural environment the industry has to take strong measures to ensure that its activities are in harmony with the environment the challenge for the construction sector is not just to respond to the need for adequate housing and rapid urbanisation but to do it in a way that is socially and ecologically responsible this book begins with the current progress of the construction industry in malaysia before shifting to the fragile relationship between construction and environment knowing the rapid development in malaysia and how construction can affect the environment this book delves into some evidence of environmental degradation in malaysia in the mist of degradation there is some light shone by the government agencies state government and some construction players who have initiated several actions to improve present situation construction players must be ready to address these concerns aware of the requirements and comply with it while the government must be ready to implement and enforce the requirement an effective planning implementation and monitoring is vital if the environment is to be part of the culture of the construction industry everywhere

this book explores how and why mexico's approach to the 2030 agenda for sustainable development and sustainable development goals sdg implementation with the lópez obrador administration is unsustainable and non transformative overshadowed by his vision of mexico's fourth transformation approached as a super mantra revolving around republican austerity and first the poor it provides original analysis of structural and conjunctural challenges facing mexico as regards people planet

and peace centered development the book reveals the promise first the poor is inconsistent with data on mexico s poverty reduction sdg1 despite record high spending on social programs and unmatched coverage the recent tendency of improvement in tackling poverty is rather ambiguous from the perspective of multidimensional poverty the book covers access to clean energy sdg7 resilient infrastructure and sustainable industrialization sdg9 and safeguarding biodiversity sdg15 by examining three megaproject case studies the oil refinery dos bocas the interoceanic corridor of the isthmus of tehuantepec and the maya train generating concern with the economic environmental and social dimensions of sustainable development the prospects for an enabling environment for sdg implementation are hampered by persistently high levels of homicides and impunity sdg16 turning mexico s armed forces into first development partner of choice is problematized as regards their reach in infrastructure megaprojects and social welfare programs in the overall context of the de risking state favoring private capital the result as determined by villanueva ulfgard has led mexico further astray from sustainable and transformative development
