the book has several unique features a number of illustrations have been given in each and these have been solved in such a simple manner that students can easily understand them the primary aim of this book is to encourage the interest and involvement of students in the exciting scenerio the theoretical side is simple and restricted it is not claim that this book is deals the topics in detail every efforts has been made to cater to the needs of the students and learned teachers

liquid chromatographic analysis of food and beverages volume 1 contains the proceedings of a symposium on the analysis of foods and beverages by hplc organized by the flavor subdivision of american chemical society and held in honolulu hawaii on april 1 6 1979 the papers explore the applications of high performance liquid chromatography hplc to food and beverage analysis emphasis is on advances in technology and instrumentation as well as analytical results in a variety of contexts this volume is comprised of 13 chapters and begins with a discussion on the use of spectroscopy in liquid chromatographic analysis of foods with particular reference to the techniques and instrumentation required to obtain reliable qualitative data on components isolated via hplc the reader is then introduced to hplc determination of naturally occurring capsaicins fast separation of amino acids using ion exchange chromatography reversed phase hplc for analyzing aflatoxins in foods and beverages via fluorescence detection and the use of dual detectors for hplc multivitamin analysis of citrus juices high performance radial chromatography of aflatoxins and hplc analysis of monosaccharides in avocado are also explored this book will be of interest to students chemists food technologists and those in the food and beverage industry

functionality of food proteins mechanisms modifications methods of assessment and applications provides researchers and users of plant based proteins with the latest developments on their functionality at the molecular and ingredient level and in food applications the book discusses the biological chemical and physical principles behind the techno functional and nutritional properties of proteins existing methods of functionality assessment and protein modification for functional enhancement with market demand for protein ingredients several lesser known sources are being utilized to develop new protein ingredients and products with some intended to replace partially or wholly traditional proteins

such as egg milk meat soy and vital gluten depending on the source and processing into ingredients the ability of these proteins to satisfy techno functional and nutritional requirements in the final food product may differ science based knowledge is needed in the area of protein functionality for making decisions along the value chain from production on the land to processing and formulation provides fundamentals of the properties that contribute to functionality nutritional and techno functional properties of proteins in food systems and their relationship to protein molecular structure describes fundamentals of the assessment of functional properties of protein with existing definitions and food systems explores fundamentals of modification strategies employed to alter nutritional and techno functional properties to enhance value of proteins in food includes examples of plant protein based products in food systems in which the role of nutritional and techno functional properties is described

imagine an analytical technique that uses no chemicals gives accurate and precise results in minutes or even continuously and is simple to install and safe to use near infrared spectroscopy nirs supplies this dream this book covers all of the essential features for successful nirs application in a practical and easily understandable format the driving force behind compiling this book is to provide knowledge on all aspects of nirs to potential users and to users who would like to delve a little deeper into the technology we have assembled the book mainly to help in the application of near infrared nir instruments and technology in industry

discusses ways of ensuring genetic diversity advances in wheat breeding and their use to improve properties such as drought resistance and cold tolerance summarises research on factors affecting nutritional and other aspects of wheat quality reviews advances in understanding wheat pests and diseases together with ways of controlling them such as disease resistant varieties integrated pest and weed management
