many emerging economies are on the front line of the devastating impacts of global warming such as desertification and extreme weather events but for historical and political reasons they follow ambitious growth targets with seemingly little concern for climate change and environmental degradation focusing on the case of turkey this book investigates the economic impacts of possible climate change policies to help meet the required mitigation targets and transition to a low carbon economy in order to reach net zero targets by 2050 in compliance with the paris agreement turkey must introduce policies that promote low carbon investments green jobs and low carbon employment more broadly this book explores the empirical evidence on the effectiveness of a carbon pricing mechanism by developing an econometric vector autoregression var model to analyse key data sets this time series analysis provides insights on a macro level dealing with aggregate data in which the role and complexity of micro interferences disappear allowing for the discovery of patterns and changes over time thus the book contributes to the literature on methodology by arguing that time series analysis is one of the best fitting approaches to estimate possible impacts of climate change policies on an economy additionally the results of the model are compared and contrasted with similar data from other emerging economies to

identify potential common policy solutions between countries at a similar stage of development this book is vital reading for researchers interested in climate policy the economics of climate change and environmental economics

this book provides a novel in depth study of the early pandemic response policy at the intersection of political economy and law it explores 1 whether the responses to covid 19 were democratically accountable 2 the ways in which new surveillance and enforcement techniques were adopted 3 the new monetary and fiscal policies which were implemented 4 the ways in which employed and unemployed persons were differently impacted by the new policies and 5 how companies were economically sustained through the pandemic a compelling look at what happens to societies when disaster strikes this book will be of interest to legal scholars political scientists and economists

lynn and vanhanen test the hypothesis on the causal relationship between the average national intelligence iq and the gap between rich and poor countries by empirical evidence based on an extensive survey of national iq tests the results of their work challenge the previous theories of economic development and provide a new basis to evaluate the prospects of economic development throughout the world they begin by reviewing and evaluating some major previous theories the concept of intelligence is then described and intelligence quotient iq introduced next they show that intelligence is a significant determinant of earnings within nations and they connect intelligence with various economic and social phenomena the sociology of intelligence at the level of sub populations in nations is examined and the independent national iq and dependent various measures of per capita income and economic growth rates variables are defined and described they then provide empirical analyses starting from the 81 countries for which direct evidence of national iqs is available the analysis is then extended to the world group of 185 countries the hypothesis is tested by the methods of correlation and regression analyses the results of statistical analyses support the hypothesis strongly the results of the analyses and various means to reduce the gap between rich and poor countries are discussed a provocative

analysis that all scholars students and researchers involved with economic development need to confront

the united kingdom since 1945 a post imperial nation is an economic and social history providing an appraisal of seventy five years of british and northern irish history the uk emerged from the second world war victorious but impoverished after a period of austerity the uk participated in the boom in the international economy that continued from the 1950s until the 1970s harold macmillan the conservative party prime minister famously told the electorate in 1957 that the country had never had it so good with global decolonization uk trade turned more to the european economic community eec and less to the commonwealth countries with the uk joining the eec and its successor the european union from 1973 until 2020 all four countries saw population growth both from the birth rate and substantial net inward migration but as this volume argues developments were not uncomplicated the need for more housing for example was partly met by tower blocks but some of these deteriorated after relatively short lives and were demolished while others became sink estates urban change also saw the decline of shopping centres and small independent shops in addition to examining this economic and social change chris wrigley focuses on popular culture from the growth in tv to developments in music and art as well as the continued influences of declining entertainments like the music hall the volume combines a focus on post imperial features with a recognition of the long shadow cast by the second world war the united kingdom since 1945 is distinctive in its long timespan and its breadth of coverage and is the perfect introduction for all readers interested in the complex contemporary history of this diverse nation
