it is rare indeed that one comes in contact with a process or technique which impacts many technical disciplines ion exchange is such a process although many books have been written on the topic of ion exchange most have been aimed at the specialist and the graduate engineer or chemist the author's experience in ion exchange technology has indicated that there are many specialists in the industry who do not understand ion exchange as a process therefore this manual has been written to acquaint and to train the author has provided background information and hands on experimental units that can be used to train laboratory technicians who later become assets in the industry this material has been used by the author for in house training and at the community college level with success it is my sincere hope that the training obtained in this manual will in some way be used to improve the environment in which we live ion exchange technology has the potential to reduce pollution and improve water supplies when applied properly in writing this manual i have had the benefit of valuable assistance i am indebted to wes macgowan and dr f x mcgarvey for helpful suggestions and continued encouragement to get the job done i have also learned much over the years from dr s fisher d r kunin and dr i abrams in one way or another they too have some influence however indirect on this modest effort

from cloud computing to big data to mobile technologies there is a vast supply of information being mined and collected with an abundant amount of information being accessed stored and saved basic controls are needed to protect and prevent security incidents as well as ensure business continuity applications of security mobile analytic and cloud smac technologies for effective information processing and management is a vital resource that discusses various research findings and innovations in the areas of big data analytics mobile communication and mobile applications distributed systems and information security with a focus on big data the internet of things iot mobile technologies cloud computing and information security this book proves a vital resource for computer engineers it specialists software developers researchers and graduate level students seeking current research on smac technologies and information security management systems

in recent years debates over healthcare have accompanied rapid advances in technology from the expansion of telehealth services to artificial intelligence driven diagnostics in this book shawn bender delves into the world of japanese robots engineered for care care robots kaigo robotto emerged early in the 21st century when roboticists began converting assembly line technologies into responsive machines for older adults and people with disabilities these robots are meant to be felt and programmed to feel while some greet them with enthusiasm others fear that they might replace a fundamentally human task based on fieldwork in japan denmark and germany bender traces the emergence of

care robots in japan and examines their impact on therapeutic practice around the world social science scholarship on robotics tends to be either speculative imagining life together with robots or experimental observing robot human interaction in laboratories or through short term field studies instead bender follows roboticists developing technologies in japan and travels with the robots themselves into everyday sites of care tracking the integration of robots into institutional care and the connection of care practice to robotics development by exploring the application of japanese robotics across the globe feeling machines highlights the entanglements of therapeutic practice and technological innovation in an age of more than human care
