this discussion of causal uncertainty in tort liability adopts a comparative approach in order to highlight the important normative epistemological and procedural implications of the various proposed solutions occupying a middle ground between the legal perspective and the philosophical views that are at stake when it comes to the resolution of tort law cases in a context of causal uncertainty the arguments will be of great interest to legal scholars legal philosophers and advanced tort law students

rossiter shows how women scientists made significant contributions to the war effort ranging from engineering and nutrition where both margaret mead and rachel carson worked well outside their areas of expertise to metallurgy and the manhattan project but she tells also of the postwar period when women scientists were told to accept demotion cheerfully and american colleges began concerted efforts to get the old girls out and replace them with all male and therefore higher paid and more prestigious faculty rossiter concludes that the period from 1940 to 1972 was a time when american women were encouraged to pursue an education in science in order to participate in the great professional opportunities that science promised yet the patriarchal structure and values of universities government and industry confronted women with obstacles that continued to frustrate and subordinate them nevertheless women scientists made genuine contributions to their fields grew in professional stature and laid the foundation for the period after 1972 which saw real breakthroughs on the status of women scientists in america
