annotation offering a blend of holistic and humanistic caring coupled with aggressive management of pain and symptoms associated with advanced disease this resource is organized around 15 competencies in palliative care developed by the american association of colleges of nursing with each chapter outlining specific skills needed to achieve each competency

a clinical case based handbook has a role in general clinicians practice of caring for patients with serious or life limiting illness the explosion of the field of hospice and palliative medicine impacts all physicians and healthcare providers fellowship trained specialists graduate in greater numbers annually these and more seasoned specialists are now certified by the american board of medical specialties as subspecialists research in this field is expanding in scope and quantity and peer reviewed journals devoted to this work are multiplying moreover peer

reviewed journals in primary care and other subspecialties of medicine regularly include papers that focus on end of life care quality of life issues and symptom management overall then access to clinical information necessary to care for patients with life limiting illness is not only essential but also increasingly available this case based clinical book aims to help with the actual practice of caring for patients with life limiting illness numerous texts and journals exist to provide the data to inform care yet there remains a need to find practical points and information about the practical application of the principles of palliative care thus we hope that the cases key points and practical tips will help health care providers who are not experts already in palliative care in the care of patients with serious illness and challenging problems some chapters follow one patient through the course of an illness to highlight the applicability of palliative care throughout the disease process

do you need a succinct introduction to the key theories and principles of palliative care and their application to practice key concepts in palliative care provides just this in a compact fifty concept guide to the field taking account of the government's end of life care strategy contributors set out the key issues affecting practice across a range of health and social care contexts the book covers topics ranging from dying and death to symptom management and spiritual care backed up with practical examples each entry comprises o a snapshot definition of the topic o key points o a discussion of the main debates o links to practice through thought provoking case histories and o suggestions for further reading key concepts in palliative care is an ideal text and handy source of reference for health and social care professionals who are developing their knowledge and skills in palliative care

series editors moira stewart judith belle brown and thomas r freeman as the population in western cultures ages more people suffer chronic ultimately life limiting diseases and medical professionals need to be equipped to cope with the ever growing pressure of palliative care this book gives guidance on how to approach patients with life limiting illness while the problems most people present to the doctor appear relatively straightforward a whole person approach to understanding the complex interaction between the person their illness and their environment should lead to a more complete consideration of the illness and better health outcomes for issues of palliative care such an approach is essential to identify and meet the many needs of desperately ill people palliative care offers a fresh look at the management of patients with international evidence based contributions the book suggests practical and challenging ways to care for the dying it is ideal for all healthcare professionals working in palliative care general practitioners and medicine and healthcare students

this textbook in palliative care nursing draws together the principles and evidence that underpins practice to support nurses working in specialist palliative care settings and those whose work involves end of life care

this book discusses the serious consequences of experiences of death and dying both for the dying and their family members and the family members grief work and health after the death of their loved ones the book will also present a health promotion perspective of palliative care patients their families and healthcare workers all approaches to patients and their families must be based on individual contexts and

frameworks and should be adjusted accordingly the possibility of following up with the bereaved after the death of their loved ones as an important health promotion intervention the healthcare workers in palliative care are subject to different stressors than other medical professionals and the priorities are not the same as in other settings ultimately fulfilling the patient's wishes as well as their needs is essential

current projections indicate that by 2050 the number of people aged over 80 years old will rise to 395 million and that by this date 25-30% of people over the age of 85 will show some degree of cognitive decline palliative care for older people a public health perspective provides a comprehensive account of the current state of palliative care for older people worldwide and illustrates the range of concomitant issues that as the global population ages will ever more acutely shape the decisions of policy makers and care givers the book begins by outlining the range of policies towards palliative care for older people that are found worldwide it follows this by examining an array of socio cultural issues and palliative care initiatives from the care implications of health trajectories of older people to the spiritual requirements of palliative care patients and from the need to encourage compassion towards end of life care within communities to the development of care pathways for older people palliative care for older people a public health perspective is a valuable resource for professionals and academics in a range of healthcare and public health fields to understand the current state of policy work from around the world the book also highlights the social cultural considerations that influence the difficult decisions that those involved in palliative care face not least patients themselves and offers examples of good practice and recommendations to inspire support and direct healthcare policy and decision making at organisational regional national and international levels

collaborative practice in palliative care explores how different professions work collaboratively across professional institutional social and cultural boundaries to enhance palliative care analysing palliative care as an interaction between different professionals clients and carers and the social context or community within which the interaction takes place it is grounded in up to date evidence includes global aspects of palliative care and cultural diversity as themes running throughout the book and is replete with examples of good and innovative practice drawing on experiences from within traditional specialist palliative care settings like hospices and community palliative care services as well as more generalist contexts of the general hospital and primary care this practical text highlights the social or public health model of palliative care designed to support active learning it includes features such as case studies summaries and pointers to other learning resources this text is an important reference for all professionals engaged in palliative care particularly those studying for post qualification programmes in the area

a team of two practitioners in psychosocial palliative care and an academic have drawn together the work of twenty eight highly experienced practitioners good practices in palliative care a psychosocial perspective provides detailed descriptions of innovative practices and how they were developed together with clear practice principles this unique contribution to palliative care literature is suitable for a wide range of health and social care professionals at student and experienced levels and is written in a user friendly style

this book encourages health professionals to reconceptualise their practice in the light of the fact that their patients are deteriorating and dying supporting them in their dichotomous role which involves affirming that person's life whilst acknowledging that that life is ending professionals are encouraged to think laterally to be creative in their use of their core skills and to use their life skills and experience to change the focus of their interventions by making these changes those involved with caring for the dying will be able to address issues related to burnout and feeling de skilled the authors share their considerable experience with the reader what works for both patient and carer professional when working in this field by providing workable solutions they empower those in disempowering situations such as when working with terminally ill children and adults the book is truly holistic and client centred in its approach upholding the philosophy of palliative care aimed at all who interact with children and adults who have a life limiting condition or who are dying offers practical examples of approaches to dilemmas and emotional issues commonly face by those working in palliative care encourages professionals to think laterally to be creative in their use of core skills and to use their life skills and experience to change the focus of their interventions moves the emphasis away from the medical model to the emotional and spiritual influences on quality of life offers clear workable guidelines and demonstrates practical solutions based on proven theory and experience to problems encountered on a day to day basis by patients and those coming into contact with them

this book is designed to provide a comprehensive insight into the key and most prevalent contemporary issues associated with palliation the reader will find viewpoints that are challenging and sometimes discerning but at the same time motivating and thought provoking in the care of persons requiring palliation this book is divided into three sections section 1 examines contemporary practice section 2 looks at the challenges in practice section 3 discusses models of care this book is an excellent resource for students practising clinicians and academics by reading the book reflecting on the issues challenges and opportunities ahead we hope it will create within the reader a passion to take on explore and further develop their palliative care practice

palliative care is moving through an important period of expansion and development spreading beyond its original hospice base to encompass care in the community in hospitals health centres clinics and nursing homes it can now be found in over 70 countries of the world what challenges does this multidisciplinary speciality face as it seeks to combine high grade pain and symptom control with sensitive psychological spiritual and social care what are the implications of current constraints on health policy and planning how do ethical issues about resource allocation and end of life care impinge can palliative care be further extended to include conditions other than cancer new themes in palliative care addresses these and many related issues in ways which will be readily accessible to students of health and social care as well as to those involved in purchasing or providing palliative care services and to social scientists interested in chronic illness death and dying its editors are respected experts in the field with backgrounds in the social sciences nursing and medicine and the book's contributors include leading international figures from a wide range of palliative care and academic disciplines

what can nurses do to support those receiving palliative care how do you ensure clear communication and maintain patients and families

preferences palliative care nursing is essential reading for nursing students professional nurses and other health and social care professionals providing supportive and palliative care to those with advanced illness or who are towards the end of life this third edition of the acclaimed textbook has been extensively revised and examines important research studies key debates around care and strategies to advance palliative care nursing in four sections the book covers key elements of nursing practice towards the end of life defining the palliative care patient providing palliative nursing care caring around the time of death challenging issues in palliative care nursing leading authors address contemporary issues and explore how to provide high quality person centred palliative care encouraging application to practice through exercises and case studies chapters completely reworked or new for this edition include those on communication living with uncertainty bereavement care the costs of caring nurses decision making and capacity and palliative care worldwide the clarity of evidence presented and coverage of a diverse range of topics make this the foundational textbook for all studying palliative care at pre registration level postgraduate level or as part of cpd study with a foreword by last edition editor professor sheila payne lancaster university uk i welcome this third edition of palliative care nursing and congratulations to the new team who have provided us with a dynamic and innovative development of a core text for palliative nursing practice as the largest workforce in palliative care and given the changing face of clinical practice for nurses including increased educational opportunity and expanding roles and responsibilities this book is timely in its focus on critical issues which frame and scope the reality of palliative care and the nursing contribution to that discipline the learning exercises in particular offer tools for educators and clinicians to reflect on practice and understand new ways of knowing in palliative care it will be an excellent resource for nursing both in the uk and ireland and to the wider international audience having drawn on the breadth of global nursing expertise to bring this book together philip larkin professor of clinical nursing palliative care university college dublin and our lady s hospice and care services dublin ireland president european association for palliative care this is a book of substance that captures the current status of palliative nursing including the values and research evidence that underpin it the changing nature of palliative nursing as an evidence based specialism is balanced with practical skills and insights from experts and also considers the needs of those working with or concerned about the dying person s well being it covers a range of challenging issues as well as drawing on the wisdom of those who actually undertake this work on a daily basis i hope that students and practitioners from all disciplines will find this a useful resource to understand the art and craft of good palliative nursing professor daniel kelly fellow of the royal college of nursing and royal college of nursing chair of nursing research cardiff university uk

the oxford textbook of palliative nursing is the definitive text on nursing care of the seriously ill and dying it is a comprehensive work addressing all aspects of palliative care including physical psychological social and spiritual needs the text is written by leaders in the field and includes an impressive section on international palliative care each chapter includes case examples and a strong evidence base to support the highest quality of care the book is rich with tables and figures offering practical resources for clinical practice across all settings of care and encompassing all ages from pediatrics to geriatrics

using a practical question and answer approach evidence based practice of palliative medicine 2nd edition helps you provide optimal care

this second edition provides the most up to date information on all aspects of palliative care including recent developments including covid 19 global policies service provision symptom management professional aspects organization of services palliative care for specific populations palliative care emergencies ethical issues in palliative care research in palliative care public health approaches and financial aspects of care this new textbook of palliative care remains a unique comprehensive clinically relevant and state of the art book aimed at advancing palliative care as a science a clinical practice and as an art palliative care has been part of healthcare for over fifty years but it still needs to explained to many healthcare education and training has been slow to recognize the vital importance of ensuring that all practitioners have a good understanding of what is involved in the care of people with serious or advanced illnesses and their families however the science of palliative care is advancing and this new edition will contribute to a better understanding this new edition offers 86 updated or new chapters out of 108 written by experts in their given fields providing up to date information on a wide range of topics of relevance to those providing care towards the end of life no matter what the disease may be we present a global perspective on contemporary and classic issues in palliative care with authors from a wide range of disciplines involved in this essential aspect of care the textbook includes sections addressing aspects such as symptom management and care provision organization of care in different settings care in specific disease groups palliative care emergencies ethics public health approaches and research in palliative care this new textbook will be of value to practitioners in all disciplines and professions where the care of people approaching death is important specialists as well as non specialists in any setting where people with serious advanced illnesses are residing it is also an important resource for researchers policy and decision makers at national or regional levels neither the science nor the art of palliative care will stand still so the editors and contributors from all over the world aim to keep this textbook updated so that the reader can find new evidence and approaches to care

this handbook is a practical and comprehensive introduction to the field of palliative medicine it provides clear insight into many of the

complex issues that arise in the delivery of palliative care and will be an invaluable resource to all disciplines involved in palliative care in hospital, hospice and community settings. 1st edition was the winner of the 1999 BMA Medical Book of the Year prize. Why you should buy this book: comprehensive and authoritative text with a very practical and thorough approach written by competent experts in the areas of their contributions. New sections on heart failure, respiratory failure and end stage renal failure coverage of medicine management and complementary medicine in palliative care discusses important areas of audit and ethical issues in palliative medicine. The second edition responds to evaluative comments on the first edition in strengthening its multidisciplinary focus and providing a broader professional approach through both the editorial team and contributors. It aims as before to embrace practical issues as well as to provide an evidence based and empirical approach from the preface.

Choices in palliative care will address the need for more information on the management of palliative care programs. Part I addresses the various settings where palliative care occurs. Part II addresses the specific disease management approach and quality of life care including cancer, heart disease, dementia and AIDS/HIV. Part III addresses specific issues in palliative care by population including minorities, the elderly and children while Part IV will address broader professional issues including developing a business plan for a palliative care program, legal and ethical issues around end of life care, quality management and policy issues.

This new edition provides the essential clinical guidance both for those embarking upon a career in palliative medicine and for those already established in the field. A team of international experts here distil what every practitioner needs to know into a practical and reliable resource.
