democracy empowers cultures and communities across the world to custom design democracy in consonance with their traditional values for example the book makes concrete proposals for muslim countries to democratize their constitutions without accepting western values and without violating the principles of islamic law more importantly universal democracy further develops the idea of free state which the author first presented in his previous book the extinction of nation states the proposed fusion of universal democracy and free state is designed to revolutionize the classical theory of government and to offer a new paradigm that accommodates both universality and uniqueness

this book aims to enhance understanding of the interactions between the international and national rule of law it demonstrates that the international rule of law is not merely about ensuring national compliance with international law international law and institutions eg international human rights treaty monitoring bodies and human rights courts respond to national contestations and show deference to the national rule of law while this might come at the expense of the certainty of international law it suggests that the international rule of law can allow for flexibility national diversity and pluralism the essays in this volume are set against the background of increasing conflict between international and national legal norms moreover the book shows that international law and institutions do not always command blind national obedience to international law but incorporate a process of adjustment and deference to national law and policies that are protected by the rule of law at the national level

human rights are by definition universal yet in a world characterized by enormous diversity there is no consensus about the implications of the universality of human rights in several regions of the world human rights conceptions are promoted that challenge the mainstream largely western dominated discourse on this subject this volume offers an analysis of context specific human rights discourses from east asia subsaharan africa and the muslim world rather than interpreting these as threats to universality the author examines how and to what extent the claims that are advanced can and should be accommodated in order to further the universality of human rights a theory of inclusive universality is developed and its implications are translated into legal techniques on the one hand there are flexibility techniques allowing for contextual diversity in the interpretation and application of human rights norms on the other hand giving credit to non western views also implies that there should be room for transformation of those human rights norms
