the last few decades have witnessed substantial liberalization trends in various industries and countries starting with the deregulation of the us airline industry in 1978 regulatory restructuring took place in further network industries such as telecommunications electricity or railways in various countries around the world although most of the liberalization movements were initially triggered by the worrying performances of the respective regulatory frameworks increases in competition and corresponding improvements in allocative and productive efficiency were typically associated with the respective liberalization efforts from an academic perspective the transition from regulated industries to liberalized industries has attracted a substantial amount of research reflected in many books and research articles which can be distilled to three main

questions 1 what are the forces that have given rise to regulatory reform 2 what is the structure of the regulatory change which has occurred to date and is likely to occur in the immediate future 3 what have been the effects on industry efficiency prices and profits of the reforms which have occurred to date liberalization in aviation brings together renowned academics and practitioners from around the world to address all three questions and draw policy conclusions the book is divided into five sections in turn dealing with aspects of competition in various liberalized markets the emergence and growth of low cost carriers horizontal mergers and alliances infrastructures and concluding with economic assessments of liberalization steps so far and proposed steps in the future

the airline industry has been buffeted by the forces of deregulation since the mid 1970s many new firms have entered some with different price and operating philosophies and some of these have thrived other airlines have gone bankrupt overall the real cost of air travel has declined considerably however the effects have varied dramatically from market to market exactly how was this massive experiment envisioned and planned how has it worked and how will it work in the long run deregulating the airlines narrates and analyzes the decisions taken by the civil aeronautics board during the transition to deregulation and the reasoning behind the airline deregulation act of 1978 it provides many comparisons of the industry before and after deregulation and uses those data to test the various hypotheses that scholars and politicians have advanced about how markets would behave if regulation were removed its findings provide information on both the demand and the cost side that will be important in molding the long run equilibrium of the industry and it discusses how quickly the industry is moving toward that equilibrium for policymakers and students of regulation in particular this study provides a unique case for contrasting the operation of an industry under close regulatory control and its operation free of such controls it is able to make use of an unusually large volume of data on the costs operations and prices of individual firms to show how markets work and how regulation works the book's in depth analysis of the impact of policy changes in the airline industry is drawn in part from the author's active involvement in implementing the new policies elizabeth bailey is dean of the graduate school of industrial administration at carnegie mellon previously she was a commissioner and vice chairman at the civil aeronautics board daniel kaplan is director of the board's office of economic analysis david r graham manager of the defense economics program at the institute for defense analysis was a board economist deregulating the airlines is tenth in the series regulation of economic activity edited by richard schmalensee

this book presents readers with a technical tool kit to understand the economics of airlines it starts by covering the key language and glossary of the air travel business which is necessary for graduates or first time employees in aviation to understand the content of conversations meetings presentations and internal aviation communications it then breaks down the complexity of the demand side of the air travel business the book then analyses revenue over two distinct time horizons specifically the short and medium runs recognising the fact that airlines operate to a fixed number of seats over a short horizon because of the way that they schedule services in advance of departure by combining revenue and costs the book then analyses airline profit with a focus on the short run and medium run decision variables that maximise airline profit the remainder of the book analyses various important topics in air transport economics including competition in airline markets key rules regulations and taxes that affect the return on capital in aviation the way that airlines form relationships and the economics of the market for oil and jet fuel among others
