recoge 1 the context 2 the assessment 3 pressures 4 human activities 5 problems 6 conclusions

this report is the proceedings of a colloquy held in riga 9 11 september 1999 the colloquy examined the conditions and results of the integration of biological and landscape diversity conservation as well as the socio economic aspects of tourism development programmes in western central and eastern europe the colloquy focused on three pilot studies conducted by the council of europe on sustainable and balanced tourism development in latvia ukraine and romania

three years ago the faculty of law and administration of the university of silesia and the faculty of law of the university of leicester embarked on a joint research and academic co operation programme with the support of the british council in warsaw the programme resulted in the organisation of two academic conferences one in leicester and one in katowice this book is the tangible result of these conferences the content of the book reflects the wide ranging nature of the collaboration between the two faculties environmental law public international law intellectual and cultural property law are the main areas that are covered but certain issues of

constitutional law european law social law company law and legal education are also addressed the main strength of this book is found in its breadth of coverage and the detailed examination of key issues such as the rights of minorities the transboundary movement of waste in europe and the environmental problems which it creates the theft and illegal exportation of cultural property and the convergence of the droit d auteur and copyright traditions

good environmental information is essential for effective sustainable development policy making and action planning accurate information increases the chances for correct decisions this does not guarantee a healthier environment but its absence seriously impedes decisions which would lead to a sustainable future ideally local sectoral corporate national regional and global reports should complement one other using for example common spatial units and databases in reality comprehensive and integrated information is often not available for today's decision makers the source book is designed to help to harmonize environmental reporting by encouraging the development of standard methods practices and terminology it evaluates and compares alternative approaches for the development production and dissemination of environmental information and combines the collective experience of environmental reporting covering all aspects of reporting from user needs to data supply

mature ecological criticism of agricultural policies is not easy targets agreed in biodiversity action plans must be achieved within a framework of agricultural and economic policies developing a balanced solution is the essence of sustainability until recently the hidden costs of high production systems on biodiversity has been ignored this booklet identifies some of the hidden costs of unsustainable production and also considers examples where conservation

management has failed the authors argue that sustainable land management is possible and that conservation and production interests can be satisfied they go on to show how a sustainable approach can be applied throughout Europe the approach adopted is the one that has underpinned the development of the European Union biodiversity strategy and is becoming a compelling force for change in Europe's decision making processes land managers and planners ecologists and agriculturalists will in particular find this booklet an invaluable resource however it will also appeal to those with a more general interest in the issues of land management

the tenth international conference on ecosystems and sustainable development is the latest in a well established series that originated from the work of the late Nobel laureate Ilya Prigogine who challenged us to develop the science of ecodynamics integrating thermodynamics ecology and economics the papers presented at the conference contained in this book cover not only new research from all over the world related to ecological problems but also new ideas and emerging concepts resulting from interdisciplinary efforts of scientists engineers and economists the included papers cover such topics as energy and the environment environmental indicators sustainable development and planning ecosystem modelling natural resources management sustainable development studies waste management soil contamination and recovery recovery of damaged areas protection and mitigation sustainable energy systems economic and benefit analysis policies environmental management climate change and adaptation forensic analysis knowledge dissemination social responsibility environmental monitoring and assessment innovation in environmental management sustainable indicators monitoring and assessment natural resources in periurban spaces territorial risk management

this reports considers the preliminary results of the murbandy moland research project monitoring urban dynamics monitoring land use changes which seeks to measure and assess the characteristics and dynamics of urban growth and land use changes such as transport and energy infrastructures based upon the creation of land use databases for 25 cities and urban areas within europe the project results show the spatial evolution of these areas with the aim of proposing a methodology for strategic monitoring of the impact of urban development on the environment
