The classic text on how nurses can use technology to improve patient care and every aspect of their job performance, education, and career. Written by leaders in nursing informatics, this comprehensive up-to-date text explores the ever-growing role technology plays in the field of nursing, offering theoretical background to help you understand how informatics serves many aspects of the profession. Essential of Nursing Informatics also gives you practical help in unlocking computing's benefits both now and into the future. Numerous case studies and examples add real-world relevance to the material. An internationally recognized contributor team provides information and insights not found in any other text on essential topics such as the application of computers to nursing administration, education, and research; electronic medical records (EMRs) and personal health records (PHRs); coding and government clinical and private sector system requirements; completely revised and updated with the latest information on specialized software; and contributions. The fifth edition of *Essentials of Nursing Informatics* covers computer systems, information theory, current issues in informatics, continuum of care, information technology systems, educational applications, research applications, international perspectives including Europe, Canada, Pacific Rim, Asia, South America, and South Africa, and the future of informatics.

This book is the essential text for all events management students. It is constructed around the authors' 60 years' event venue and experience event management framework. It contains 87 key models within the 60 years' framework that all events management students will need to be successful in their studies, setting them up for a fantastic career in the fast-growing events industry. It broadens the definition of events managers, which the authors in the new events paradigm reframe as event venue and experience event managers. Finally, it is authored by academics Chris Edger and Richard Oddy, who between them have nearly fifty years' experience operating, teaching, and writing within the leisure events domain.

Taking an explicit international approach to the subject, *Events Management* combines theory and practice to address the challenges and opportunities of working in a global world to help prepare students for the realities of the events management sector. Written by a high-profile international team of editors and contributors, the text features cases spanning Europe, Africa, Asia, Australia, and North America and covers key topics and issues such as fundraising, sponsorship, globalization, and sustainability. It also aims to bolster student employability through the inclusion of features such as practical asides and case studies to give students a window into the real life of a practitioner. Brand new to the third edition is an in-depth examination of the implications of COVID-19 for international events, including sponsorship arrangements, risk management, and future job prospects for events management graduates. Two brand new chapters covering developments in digital marketing and accessible events management case studies featuring India, Australia, Peru, Europe, UK, and USA and covering events such as music festivals, Holi, Mardi Gras, as well as mega events such as the Olympics, updated theory about the critical global issues affecting events, and the main drivers of change in the industry. A companion website featuring links to interactive learning resources, an instructors' manual for lecturers, events-related videos for fun, additional educational viewing, and author-selected Sage Journal articles for advanced learning.

suitable for courses in events management and international events management
