the dramatic race to transplant the first human heart spanned two years three continents and five cities against a backdrop of searing tension scientific brilliance ethical controversy racial strife and emotional turmoil it culminated in a terrifying moment in the early hours of 3 december 1967 when in a cramped operating theatre in a cape town hospital professor chris barnard stared into an empty cavity from which he had just removed a heart he knew that he had only minutes left to make history and save the life of a 55 year old man by filling the gaping hole in his chest with a heart which had just been beating inside a 25 year old woman every second counts is the story of this gripping race to conquer the greatest of medical challenges it also reveals the truth about the man at the centre of it all whose turbulent life story was just as gripping the kind of true story that would be dismissed as far fetched if presented as

fiction it combines an utterly compelling portrait of cutting edge science with raw human drama and shows how the course of medicine itself was changed for ever

every ten minutes someone is added to the national transplant waiting list according to the united network for organ sharing currently around 118 415 people need a lifesaving organ transplant as transplants become more common controversies over who should receive an organ and possible methods of increasing the organ supply have arisen this book offers a comprehensive and balanced discussion of the issues surrounding organ and tissue transplants readers will learn about the moral ethical and medical dilemmas that surface as science continues to develop new lifesaving and life enhancing technologies

facing inequalities in transplantation a call to improve access to care outcomes and career developments following the call for action launched at the opening ceremony of the 2021 esot congress in milan and the mandate of the esot action day announced at the celebration of esot 40th anniversary on april 28 2022 transplant international is pleased to announce the launch of a special issue on diversity equity and inclusion in transplantation gender disparities minorities discriminations barriers related to migration limited access to healthcare because of low income and deprived social networks are still routinely embedded in current culture systems policies and practices perpetuating a vicious cycle of inequity transplant international joins the esot call for action to ensure equity in transplantation worldwide today and build a more sustainable future for all tomorrow the organ transplantation rate per million population in 2020 demonstrated significant variation across eu countries despite legal frameworks existing to prevent discrimination equal access to transplantation remains a significant challenge for certain populations ethnic minorities comorbidities such as diabetes obesity and hepatitis b c are more prevalent in certain ethnic minority groups this negatively impacts donation and transplantation rates resulting in disproportionately high numbers of ethnic minority patients remaining on waiting lists migrants face barriers in access to transplant services including lower awareness a lack of full healthcare coverage linguistic obstacles and cultural differences gender bias women donate more organs than they receive with men making up the majority of organ transplant recipients while this reflects the increased incidence of conditions that require transplantation amongst men psychological and socio economic factors also contribute socioeconomics patients with higher income and education have greater access to the transplant waitlist and transplantation compared with patients with lower income and minimal education restricted groups both children due to difficulties finding appropriately sized organs and highly sensitised individuals due to a restricted donor pool face difficulties in receiving a transplant geography there are significant regional variations in the number of transplants performed within europe in many countries transplant centres are not evenly distributed across their territory with wealthier areas typically having the most centres this is even more critical in emerging economies let alone least developed countries where access to transplantation is sometimes non

existent the aim of this special issue is to publish a collection of manuscripts focusing on the evidence examining race gender biased socioeconomic and regional inequity in transplantation we welcome submissions from the whole field of transplantation science from basic to clinical and translational studies aiming to specifically tackle the structural factors resulting in inequity in transplantation we also encourage contributions as opinion personal perspective review clinical experience cohort series as well as clinical studies covering but not limited to the following issues

a compilation of data on end stage renal disease esrd with 1990 data includes incidence mortality and morbidity by primary diagnosis treatment modality and by other sociodemographic variables also includes data on kidney transplants and transplant outcomes

although pancreas transplants have been performed for more than 30 years the last few years have witnessed significant growth in the options available for pancreas transplantation transplantation of the pancreas edited by drs gruessner and sutherland provides a state of the art definitive reference work on pancreas transplantation for transplant surgeons and physicians as well as for endocrinologists diabetologists nephrologists and neurologists the editors from the renowned university of minnesota transplant division and the diabetes institute have assembled a group of renowned experts to provide an all inclusive overview of pancreas transplantation the text features insights on the pathophysiology of diabetes mellitus and the limitations of nontransplant treatments highlights experimental research and clinical history of pancreas transplantation and compares and contrasts different surgical procedures the discussions detail the broad spectrum of post transplant complications and their treatments which frequently require skills in general vascular and laparoscopic surgery interventional radiology critical care and infectious disease chapters on pretransplant evaluation immunosuppression immunology pathology long term outcome quality of life and cost effectiveness focus on issues unique to pancreas recipients evolving areas such as pretransplant evaluation of pancreas transplant candidates living donation and the current status of islet transplantation are discussed augmented by more than 280 illustrations including full color line drawings created exclusively for the text this book is the standard reference for all transplant professionals as well as for all physicians caring for the transplant patient
