the idea for this text stemmed from the fruitful experience gathered during the training course of 9 nigerian university students organized in naples from 3 to 18 september 2008 by the team of fondazione idis citt della scienza under the project science centre owerri the training course turned out to be not only an educational opportunity to acquire knowledge and skills for these students but also a real and practical tool that later led to the realization of the first science festival of owerri in nigeria in may 2009 this in turn sparked the idea of creating a highly practical handbook for those who want to face the challenge of developing new projects for the dissemination and socialization of science in developing countries in these countries the role of scientific education and training in schools is not sufficient to arouse scientific curiosity among young people and make the population aware of the importance of scientific knowledge in everyday life moreover science and technology are indispensable tools for people s empowerment and should be supported with actions that encourage curiosity about science and the intelligent use of technology to bridge the divide with developed countries it is therefore necessary to set up activities that are carefully targeted to promote and communicate science the text has been designed as a practical guide to be used in a variety of contexts scientific events or more structured science festivals training the creation of scientific cultural associations and the development of new science centres besides being an excellent tool for training and supporting the design and planning phases the manual can also be used as a reference work for institutions and local cultural services which have to select projectsof this type

this is the second and fully updated edition of an authoritative handbook aimed at all those involved in designing educational exhibitions it lays out guidelines for exhibition design that for a given cost will tend to optimize the educational value of exhibitions to their target audience it offers practical guidance on all aspects of the work from the planning administration and evaluation of a large programme of exhibition work down to the selection of media and the design and construction of the single exhibit it discusses the things that should be thought about and the things that should be done in setting up educational exhibits paying particular attention to the pitfalls that must be identified and avoided if the work is to be done well the handbook is essential for all those who are concerned with mounting educational exhibitions whether they be administrators designers educationalists planners or in specific subject areas it will be required reading for students following postgraduate courses in museology museum studies or similar courses at institutions throughout the world no special background knowledge is assumed as the readership will be as varied as the skills required to put together and evaluate an exhibition

examines the conceptualization development and impact of this san francisco science museum founded by frank oppenheimer brother and colleague of robert oppenheimer both a conceptual analysis of art and perception in the explanation of science and a history of oppenheimer s struggle to gain acceptance for his ideas annotation copyrighted by book news inc portland or
