this timely volume explores evolutionary cross cultural physiological environmental and pathological influences on variation in human biological aging chapters by leading experts use models traditionally unique to anthropological research in order to illuminate human biological aging as a heterogeneous and variable process by explicitly emphasizing evolutionary biology and human variation the book presents the fascinating perspective of human biological aging as the end result of a set of co adapted genetic complexes associated with successful growth development reproduction and parenting of offspring while examining human life span and life history parameters as population level phenomena the book also emphasizes human phenotypic plasticity as key to understanding aging this broad evolutionary perspective is unique in biological gerontology a field that is often reductionist in method and theory the book is sure to appeal to students teachers and researchers of geriatrics gerontology biology and anthropology of aging and human population biology

designed to address the needs of anthropology professors who prefer to make extensive use of ethnographies and other supplementary readings in their courses this is a concise accurate introduction to the basic ideas and practices of contemporary cultural anthropology not a standard textbook core concepts is more like an annotated bibliography of the terms and concepts that anthropologists use in their work the book will prepare students to read ethnography more effectively and with less confusion and misunderstanding

for introductory course in physical anthropology

abstract clinical anthropology applies the principles of anthropological theory to practical patient care maintaining that cultural health patterns are not isolated but are integrated with a culture's complex system of beliefs and values clinical anthropology can be the link between folk medicine and traditional medical practice cultures provide systems for health care and health professionals can

promote health and patient care when they comprehend these systems prenatal clinics hospital deliveries and the health and healing practice of five ethnic groups in miamia florida are examined health programs succeed or fail largely due to the sociocultural context of the program and how well that context is considered family planning cultural conflicts over the diagnosis of chagas disease and a successful bicultural educational program to reduce coronary heart disease are discussed finally nutritional anthropology and anthropological views on aging and dying are examined

the only book that integrates the foundations and the most current innovations in the field from the ground up over the past twenty years this field has rapidly evolved from the study of physical anthropology into biological anthropology incorporating the evolutionary biology of humankind based on information from the fossil record and the human skeleton genetics of individuals and of populations our primate relatives human adaptation and human behavior stanford combines the most up to date comprehensive coverage of the foundations of the field with the modern innovations and discoveries
