Exploring physical anthropology is a comprehensive full color lab manual intended for an introductory laboratory course in physical anthropology. It can also serve as a supplementary workbook for a lecture class particularly in the absence of a laboratory offering. This laboratory manual enables a hands-on approach to learning about the evolutionary processes that resulted in humans through the use of numerous examples and exercises. It offers a solid grounding in the main areas of an introductory physical anthropology lab course: genetics, evolutionary forces, human osteology, forensic anthropology, comparative functional skeletal anatomy, primate behavior, paleoanthropology, and modern human biological variation.

This manual provides students in academic laboratory courses with hands-on experience of the major processes of forensic anthropology designed to accompany the textbook "Introduction to Forensic Anthropology". The manual introduces core procedures and protocol with exercise worksheets to reinforce the methodologies of forensic anthropology and enhance student comprehension. For the fourth edition, the manual has been updated in line with the textbook, incorporating new methods, figures, and worksheets. Each chapter contains explanations of the terminology, osteological features, and measurements needed to understand each of the topics. Chapters may be covered in one session or multiple sessions and include lists of both basic and optional lab materials, enabling instructors to tailor each lab to the resources they have available.
