in 1877 ruskin accused whistler of flinging a pot of paint in the public's face was he right after all whistler always denied that the true function of art was to represent anything if a painting does not represent what is it other than mere paint flung in the public's face whistler's answer was simple painting is music or it is poetry georges braque half a century later echoed whistler's answer so did braque's friends apollinaire and ponge they presented their poetry as music too and as painting but meanwhile composers such as satie and stravinsky were presenting their own art music as if it transposed the values of painting or of poetry the fundamental principle of this intermedial aesthetic which bound together an extraordinary fraternity of artists in all media in paris from 1885 to 1945 was this we must always think about the value of a work of art not within the logic of its own medium but as if it transposed the value of art in another medium peter dayan traces the history of this principle how it created our very notion of great art why it declined as a vision from the 1960s and how in the 21st century it is fighting back

we tend to take for granted the labels we put to different forms of music this study considers the origins and implications of the way in which we categorize music today whereas earlier ways of classifying music were based on its different functions for the past two hundred years we have been obsessed with creativity and musical origins and classify music along these lines matthew gelbart argues that folk music and art music became meaningful concepts only in the late eighteenth and early nineteenth centuries and only in relation to each other

this collection of essays by musicologists and art historians explores the reciprocal influences between music and painting during the nineteenth century a critical period of gestation when instrumental music was identified as the paradigmatic expressive art and theoretically aligned with painting in the formulation *ut pictura musica* as with music so with painting under music s influence painting approached the threshold of abstraction concurrently many composers cultivated pictorial effects in their music individual essays address such themes as visualization in music the literary vs pictorial basis of the symphonic poem musical pictorialism in painting and lithography and the influence of wagner on the visual arts in these and other ways both composers and painters actively participated in interarts discourses in seeking to redefine the very identity and aims of their art also includes 17 musical examples

since the late 1980s the boundaries between the musicologies have become increasingly blurred most notably a growing number of musicologists have become interested in the ideas and methodologies of ethnomusicology and in particular in applying one of the central methodological tools of ethnomusicology ethnography to the study of western art music a tradition which had previously been studied primarily through scores recordings and other historical sources alongside this since the 1970s a small number of ethnomusicologists have also written about western art music thus complicating the idea of ethnomusicology as the study of other music indeed there has been a growth in this area of scholarship in recent years approaching western art music through the perspectives of ethnomusicology can offer new and enriching insights to the study of this musical tradition as shown in the writings presented in this book the current volume is the first collection of essays on this topic and includes work by authors from a range of musicological and ethnomusicological backgrounds exploring a variety of issues including music in orchestral outreach programmes new audiences for classical music concerts music and conflict transformation ethnographic study of the rehearsal process and the politics of a high profile music festival this book was originally published as a special issue of ethnomusicology forum

this volume offers a comprehensive range of approaches to the work of mark e smith and his band the fall in relation to music art and politics mark e smith remains one of the most divisive and idiosyncratic figures in popular music after a recording career with the fall that spans thirty years although the fall were originally associated with the contemporaneous punk explosion from the beginning they pursued a highly original vision of what was possible in the sphere of popular music while other punk bands burned out after a few years only to then reform decades later as their own cover bands the fall continue to evolve while retaining a remarkable consistency even with the frequent line up changes that soon left mark e smith as the only permanent member of the group the key aspect of the group that this volume explores is the invariably creative unfailingly critical and often antagonistic relations that characterize both the internal dynamics of the group and the group s position in the pop cultural surroundings the fall s ambiguous position in the unfolding histories of british popular music and therefore in the new heritage industries of popular culture in the uk from post punk to anti thatcher politics to the factory fiction of manchester and on into mark e smith s current role as ageing enfant terrible of rock illustrates the uneasy relationship between the band their critical commentators and the historians of popular music this volume engages directly with this critical ambiguity with a diverse range of approaches to the fall this volume opens up new possibilities for writing about contemporary music beyond traditional approaches grounded in the sociology of music cultural studies and music journalism an aim which is reflected in the variety of provocative critical approaches and writing styles that make up the volume
