history's most notorious and brutal killers still enjoy fame as public fascination with their lives and their crimes continues to grow. *Stone Cold Souls* is a detailed examination of the most brutal killers in history. Moffatt does what he does best by looking at historical accounts of events, analyzing them from a psychological perspective, and presenting his assessment in a captivating fashion. He examines different types of killers, offers case studies, and historical context, and describes what sets these cases apart from other kinds of killings. Even in a day and age where pop culture has made serial crime a mainstay of movies and books, the depravity of the killers profiled in this work will still shock even a desensitized reader. Men, women, and children alike have committed crimes so atrocious that it is hard to imagine that these events are not works of fiction. Moffatt examines the difficult questions that inevitably arise when one reads cases of unthinkable torture and cruelty: why were these people simply evil, or is it possible that, given other circumstances, they could have redirected their energies into more productive outlets? The author answers these questions and others, and reveals the lives and crimes of these ruthless killers. *Stone Cold Souls* features such well-known cases as Andrei Chikatilo, Marc Dutroux, Herman Webster Mudgett, Charles Ng, Leonard Lake, Lawrence Bittaker, Roy Norris, Ed Gein, Edmund Kemper, Henry Lee Lucas, Gilles de Rais, Ivan the Terrible, Richard Ramirez, Holly Ann Harvey, Sandy Ketchum, Mary Bell, Jesse Pomeroy, Josef Mengele, Marshall Applewhite, Jeffrey Lundgren, David Koresh, Jim Jones, Father Oliver O'Grady, Charles Cullin, Harold Shipman, Michael Swango, Myra Hindley, Karla Homolka, Aileen Carol Lee Wuornos, Elizabeth Bathory, Charles Sobhraj, Albert Fish, Donald Harvey, and Dennis Rader.

The phenomena of mass shootings appear to be on the rise within the past decade. Shootings have occurred in schools, religious institutions, concerts, movie theaters, and other public venues, as well as at home in the form of domestic mass shootings. This phenomenon is influenced by factors such as access to guns, mental illness, the desire for fame, revenge from being bullied, and copycat killing, to name a few. Mass shootings are a serious problem for society and must be explored further in order to provide preventive solutions. *The Handbook of Research on Mass Shootings and Multiple Victim Violence* is a pivotal reference source that provides vital research on contributing factors to gun violence, characteristics of shooters and victims, solutions for preventing incidents from occurring, and the impact these shootings have on the community. While highlighting topics such as school safety, cyberbullying, and mental illness, this publication is ideally designed for law enforcement, government officials, psychologists, psychiatrists, sociologists, politicians, policymakers, law makers, academicians, researchers, and students seeking current research on the latest empirical findings of mass shootings in the United States.

Written in an engaging manner that challenges critical thinking throughout the text, it is very readable and balances providing facts grounded in research with case examples. Minna Cirino, Shenandoah University, now with Sage Publishing, *The Will to Kill: Making*
