filip müller came to auschwitz with one of the earliest transports from slovakia in april 1942 and began working in the gassing installations and crematoria in may he was still alive when the gassings ceased in november 1944 he saw millions come and disappear by sheer luck he survived müller is neither a historian nor a psychologist he is a source one of the few prisoners who saw the jewish people die and lived to tell about it eyewitness auschwitz is one of the key documents of the holocaust

this is a unique eye witness account of everyday life right at the heart of the nazi extermination machine slomo venezia was born into a poor jewish italian community living in thessaloniki greece at first the occupying italians protected his family but when the germans invaded the venezias were deported to auschwitz his mother and sisters disappeared on arrival and he learned at first with disbelief that they had almost certainly been gassed given the chance to earn a little extra bread he agreed to become a sonderkommando without realising what this entailed he soon found himself a member of the special unit responsible for removing the corpses from the gas chambers and burning their bodies dispassionately he details the grim round of daily tasks evokes the terror inspired by the man in charge of the crematoria angel of death otto moll and recounts the attempts made by some of the prisoners to escape including the revolt of october 1944 it is usual to imagine that none of those who went into the gas chambers at auschwitz ever emerged to tell their tale but as a member of a sonderkommando slomo venezia was given this horrific privilege he knew that having witnessed the unspeakable he in turn would probably be eliminated by the ss in case he ever told his tale he survived this is his story published in association with the united states holocaust memorial museum also available as an audiobook

a visiting fellow to the human rights centre at the university of essex robert priseman is a painter curator and writer whose projects include no human way to kill sumac the francis bacon interiors and fame in nazi gas chambers from memory to history he presents a series of beautifully detailed drawings of nazi gas chambers from the outside and contrasts those with stark paintings of the interiors expanded on by thoughtful and insightful essays by professor peter vergo and professor rainer schulze this project seeks to explore how on the 20th january 2012 sixteen men could have sat around a table and made the decision to kill eleven million european jews by lethal gas genocides are not unusual in human history and have occurred around the world many times since the second world war the holocaust is however unique amongst all these mass killings because it is the only time in history where industrial processes have been applied by a culturally advanced people to the taking of human life we don t like to think of ourselves as possessing this capacity and perhaps that is where denial takes its role denial can of course be used as a coping mechanism by ignoring or disbelieving powerful events which have the potential to emotionally overwhelm us we enable our everyday lives to continue we gain the capacity to carry on as normal the gas chambers of auschwitz sobibor majdanek and the many other locations of nazi mass killing did not just appear overnight someone somewhere received an order to tile the gas chamber someone was contracted to make and fit the pipes supply the bricks make the metal doors and their hinges all these people and many more will have received money for their work and not thought of themselves as directly responsible for the atrocity of the holocaust because they did not carry out the actual killing or come up with the original policy they were in fact just getting on with their lives

this book reveals how mainstream historians claiming to refute revisionists spread their myths distortions and lies this book debunks every

single gas chamber claim made for any of the german war time camps

in the years after its first publication the so called leuchter report about the alleged gas chambers of auschwitz and majdanek has been subject to massive and partly justified criticism in 1993 rudolf a researcher from the prestigious german max planck institute published a thorough forensic study about the alleged gas chambers of auschwitz which irons out the deficiencies and discrepancies of the leuchter report the rudolf report is the first english edition of this sensational scientific work it analyzes all existing evidence on the auschwitz gas chambers and exposes the fallacies of various failed attempts to refute rudolf s report the conclusions are quite clear the alleged gas chambers of auschwitz could not have existed in the appendix rudolf describes his unique persecution

a true story of life and experience inside the gas chambers

auschwitz was a center of chemistry gigantic factories for rubber and fuel but what we associate with auschwitz are gas chambers and zyklon b two chemical things as well how did the gas chambers look like how did they work what does zyklon b kill did it leave traces that can be found still today find out

the last gasp takes us to the dark side of human history in the first full chronicle of the gas chamber in the united states in page turning detail award winning writer scott christiansen tells a dreadful story that is full of surprising and provocative new findings first constructed in nevada in 1924 the gas chamber a method of killing sealed off and removed from the sight and hearing of witnesses was originally touted as a humane

method of execution delving into science war industry medicine law and politics christianson overturns this mythology for good he exposes the sinister links between corporations looking for profit the military and the first uses of the gas chamber after world war i he explores little known connections between the gas chamber and the eugenics movement perhaps most controversially he has unearthed new evidence about american and german collaboration in the production and lethal use of hydrogen cyanide and about hitler s adoption of gas chamber technology developed in the united states more than a book about the death penalty this compelling history ultimately reveals much about america s values and power structures in the twentieth century

until the late 1980s most of what the world knew about the infamous auschwitz camp came from witness testimony but witnesses can be wrong for multiple intentional and accidental reasons so how can we reach solid ground about the history of auschwitz if we cannot rely on witnesses in the 1980s french hobby historian jean claude pressac addressed this challenge by trying to prove only with documents that the many testimonies about mass extermination events at the auschwitz camp are essentially true in 1989 he published a 564 page book in oversize landscape format featuring reproductions of hundreds of original german wartime documents on auschwitz that were thoroughly annotated by pressac with this trail blazing book titled auschwitz technique and operation of the gas chambers auschwitz research for the first time obtained a solid foundation supported by documents of course research has not stood still since then after the collapse of the soviet union a lot of previously classified archival material was made accessible this material was subsequently analyzed by a number of independent researchers the main text of the present book gives an overview of these research results while frequently referring to pressac s 1989 book which although no longer in print can be viewed free of charge online unfortunately however the low resolution images of pressac s many documents posted online are rather unsatisfactory hence a reprint of pressac s magnum opus was desirable but because it has become partly obsolete due to more recent research it would be irresponsible to offer pressac s statements from 1989 as the final word on topic this booklet therefore aims at bringing owners of an original copy readers of a library copy or the online version of pressac s book or anyone else up to speed with the current knowledge on document research into auschwitz the text of this book is also included in the reprint
