the notion that every state has an interest in the territorial integrity of every other state no matter how distant they are and how slight their connections is peculiar to the twentieth century to be sure poets and philosophers had perceived humanity s common interest in preventing wars and statesmen had found that aggression from outside the community could be deterred by the mutual defense of those within it but no one had ever tried to organize an all embracing system that used the collective force of its members to prevent one of them from attacking another it took the wide devastation of two world wars and the failure of the balance of power systems that preceded them to instigate the search for a more effective way to manage power to the founders of the league of nations and the united nations there was nothing extravagant about the idea that peace is indivisible their countries had been drawn into wars that were largely not of their making they had learned that to control their destinies they must act early with others to keep the peace it is this core of national self interest that drives collective security if the system works at any moment in history it is because its members believe they have enough stake in the existing order to warrant taking measures against any nation that threatens to destroy the fabric of that order

this book examines the use of presidential power during the war on terror justin deplato joins the debate on whether the constitution matters in determining how each branch of the federal government should use its power to combat the war on terror the actions and words of presidents george w bush and barack obama are examined deplato s findings support the theory that executives use their own prerogative in determining what emergency powers are and how to use them according to deplato the presidents argue that their powers are implied in article ii of the constitution not expressed this conclusion renders the constitution meaningless in times of crisis the author reveals that presidents are becoming

increasingly cavalier and that the nation should consider adopting an amendment to the constitution to proffer expressed executive emergency powers

following books by malcolm gladwell and dan ariely noted economics professor william i silber explores the hail mary effect from its origins in sports to its applications to history nature politics and business a quarterback like green bay s aaron rodgers gambles with a hail mary pass at the end of a football game when he has nothing to lose the risky throw might turn defeat into victory or end in a meaningless interception rodgers may not realize it but he has much in common with figures such as george washington rosa parks woodrow wilson and adolph hitler all of whom changed the modern world with their risk loving decisions in the power of nothing to lose award winning economist william silber explores the phenomenon in politics war and business where situations with a big upside and limited downside trigger gambling behavior like with a hail mary silber describes in colorful detail how the american revolution turned on such a gamble the famous scene of washington crossing the delaware on christmas night to attack the enemy may not look like a hail mary but it was washington said days before his risky decision if this fails i think the game will be pretty well up rosa parks remained seated in the white section of an alabama bus defying local segregation laws an act that sparked the modern civil rights movement in america it was a life threatening decision for her but she said i was not frightened i just made up my mind that as long as we accepted that kind of treatment it would continue so i had nothing to lose the risky exploits of george washington and rosa parks made the world a better place but demagogues have inflicted great damage with hail marys towards the end of world war ii adolph hitler ordered a desperate counterattack the battle of the bulge to stem the allied advance into germany he said the outcome of the battle would spell either life or death for the german nation hitler failed to change the war s outcome but his desperate gamble inflicted great collateral damage including the worst wartime atrocity on american troops in europe silber shares these illuminating insights on these figures and more from woodrow wilson to donald trump asylum seekers to terrorists and rogue traders collectively they illustrate that downside protection fosters risky undertakings that it changes the world in ways we least expect

the withdrawal of the united states from afghanistan has left a lasting impact on both afghanistan s future and on asian geopolitics it has also brought china into focus this book traces the emergence of china as a key player in afghanistan and the evolution of china s afghan policy

especially with respect to its relations with the taliban beijing s dominant role in afghanistan s future is a potentially game changing development in asian geopolitics even if questions remain about the former s appetite to step in to fill the void and the limits of its ambitions in the comrades and the mullahs ananth krishnan and stanly johny examine what beijing s interests are and the drivers of its foreign policy and more specifically how its new silk road project the belt and road initiative is shaping china afghan relations they look at how afghanistan has emerged as a key point on the corridor heading west from xinjiang and discuss the xinjiang factor drawing on their travels to china s western frontiers as well as the internal dynamics that are pushing beijing s westward march another factor is the east turkestan islamic movement and the terror groups that are leading to an increasingly securitized approach to china s western regions and beyond including possible chinese plans to deploy special forces along the china afghan border areas in the wakhan corridor and badakhshan region china s afghan engagement has also deepened its all weather alliance with pakistan with beijing increasingly leaning on islamabad particularly in its outreach to the taliban and other elements in afghanistan that have long been supported by the pakistani state and is a perennial source of tension between islamabad and kabul the authors show how this increasing closeness is alarming for india and might have far reaching consequences especially in kashmir
