within us there is a world in continuous boiling made up of a whole network of circuits connections and structures that give rise to a permanent torrent of thoughts and emotions which gradually circulate through our minds on many occasions without our causing them voluntarily this happens daily throughout all hours of the day it is a passionate space of images that arise in an accelerated way and repeat and fade as time goes by it is like a chaotic disorganized universe on which it is

necessary to establish an order a classification of priorities a logic and a new structure it is our inner world it is like another hidden life that we should take out to try to analyze it instead of continuing to remain in the daily film in which we are sometimes immersed and do not recognize ourselves so that we come to feel empty when we verify that on many occasions we are not ourselves

using reconstructive ideas available in classical indian original works this book makes a departure in the style of modern writings on indian moral philosophy it presents indian ethics in an objective secular and wherever necessary critical manner as a systematic down to earth philosophical account of moral values virtues rights and obligations it thereby refutes the claim that indian philosophy has no ethics as well as the counter claim that it transcends ethics it demonstrates that moral living proves that the individual his society and the world are really real and not only taken to be real for behavioral purposes as the advaitins hold the self is amoral being a non agent moksa is not a moral value and the karmic theory because of involving belief in rebirth does not fuarantee that the doer of an action is also the experienter of its results contrary to what is commonly held and indian ethics can sustain itself even if such notions are dropped rajendra prasad calls indian ethics organismic because along with ethical concerns it also covers issues related to professions politics administration sex environment etc therefore in one format it is theoretical and applied normative and metaethical humanistic and non humanistic etc of course within the limits of the then cognitive enquiry

the public outcry for a return to moral education in our schools has raised more dust than it s dispelled building upon his provocative ideas in on becoming responsible michael pritchard clears the air with a sensible plan for promoting our children s moral education through the teaching of reasonableness pritchard contends that children have a definite but frequently untapped capacity for reasonableness and that schools in a democratic society must make the nurturing of that capacity one of their primary aims as fundamental to learning as the development of reading writing and math skills reasonableness itself he shows can be best cultivated through the practice of philosophical inquiry within a classroom community in such an environment children learn to work together to listen to one another to build on one another s ideas to probe assumptions and different perspectives and ultimately to think for themselves advocating approaches to moral education that avoid mindless indoctrination and timid relativism pritchard neither preaches nor hides behind abstractions he makes liberal use of actual classroom dialogues to illustrate children s remarkable capacity to engage in reasonable conversation about moral concepts involving fairness cheating loyalty truthtelling lying making and keeping promises obedience character and responsibility he also links such discussions to fundamental concerns over law and moral authority the roles of teachers and parents and the relationship between church and state pritchard draws broadly and deeply from the fields of philosophy and psychology as well as from his own extensive personal experience working with children and teachers the result is a rich and insightful work that provides real hope for the future of our children and their moral education
