eurographics workshops on graphics hardware have now become an established forum for an exchange of information concerning the latest developments in this field of growing importance the first workshop took place during eg 86 in lisbon all participants in this event considered it a very rewarding workshop to be repeated at future eg conferences this view was reinforced at the eg 87 hardware workshop in amsterdam which firmly established the need for and a high interest in such a colloquium of technical discussion in this specialist area within the annual eg conference the third eg hardware workshop took place in nice in 1988 and this volume is a record of the fourth workshop at eg 89 in hamburg the material in this book contains papers representing a comprehensive record of the contributions to the 1989 workshop the first part considers algorithms and architectures of graphics systems these papers discuss the broader issues of system design without necessarily raising issues concerning the details of the implementation the second part on systems describes hardware solutions and realisations of machines dedicated to graphics processing many of these contributions make important references to algorithmic and architectural issues as well but there is now a greater emphasis on realisation indeed many vlsi designs are described

this ima volume in mathematics and its applications semiconductors part ii is based on the proceedings of the ima summer program semiconductors our goal was to foster interaction in this interdisciplinary field which involves electrical engineers computer scientists semiconductor physicists and mathematicians from both university and industry in particular the program was meant to encourage the participation of numerical and mathematical analysts with backgrounds in ordinary and partial differential equations to help get them involved in the mathematical aspects of semiconductor models and circuits we are grateful to w m coughran jr julian cole peter lloyd and jacob white for helping farouk odeh organize this activity and trust that the proceedings will provide a fitting memorial to farouk we also take this opportunity to thank those agencies whose financial support made the program possible the air force office of scientific research the army research office the national science foundation and the office of naval research a vner friedman willard miller j r preface to part ii semiconductor and integrated circuit modeling are an important part of the high technology chip industry whose high performance low cost microprocessors and high density memory designs form the basis for supercomputers engineering work stations laptop computers and other modern information appliances there are a variety of differential equation problems that must be solved to facilitate such modeling

climate change variability has impacts on lesotho's wetlands which are host to a significant portion of the country's predominately agricultural

economy intervening in this sector could potentially increase food security and reduce poverty fao was called upon to implement sustainable land and water management practices and resource conservation in an effort to reduce the affected communities vulnerability while increasing their capacity to adapt to the effects of climate change the evaluation found the project to be effective in improving the livelihoods and quality of life of the affected communities it has been particularly relevant to lesotho s national priorities focusing on sustainable land management and drought management future projects should place more attention on gender issues particularly showcasing how women s livelihoods have been improved by fao intervention
