food security will exist when all people at all times have physical and economic access to sufficient safe and nutritious food to meet their dietary needs and food preferences for an active and healthy life as stated in the rome declaration in 1996 given the dimension of the current global food crisis food security means adopting effective and specific actions at individual household national regional and global levels food security invites us to reflect upon ethical principles like human equity justice between current and future generations respect for human dignity and sustainable food production we strive to maintain our basic ethical convictions and engage in societal debates about other important values while we do this we may have to change our ways of life and learn to create new priorities in the face of global responsibility science and technology are key tools to reach the millenium goals providing both society and decision makers alike with relevant information and new options within an ethical framework the contributions found in this publication bring together the perspectives of a diverse group of authors coming from the academic world the public sector and non governmental organisations ngos they provide the latest views on global food security ethical and legal challenges

the rise of manufacturing intelligence is fuelling innovation in processes and products concerning a low environmental impact over the product s lifecycle sustainable intelligent manufacturing is regarded as a manufacturing paradigm for the 21st century in the move towards the next generation of manufacturing and processing technologies the manufacturing industry has reached a turning point in its evolution and new business opportunities are emerging with sustainable development arises the immense challenge of combining innovative ideas regarding design materials and products with non polluting processes and technologies conserving energy and other natural resources on the other hand sustainability has become a key concern for government policies businesses and the general public model cities are embracing novel ecosystems combining environmental social and economic issues in more inclusive and integrated frameworks green design materials and manufacturing processes includes essential research in the field of sustainable intelligent manufacturing and related topics making a significant contribution to further development of these fields the volume contains reviewed papers presented at the 2nd international conference on sustainable intelligent manufacturing conjointly organized by the centre for rapid and sustainable product development polytechnic institute of leiria and the faculty of architecture technical university of lisbon both in portugal this event was

held at the facilities of the faculty of architecture lisbon from june 26 to june 29 2013 a wide range of topics is covered such as eco design and innovation energy efficiency green and smart manufacturing green transportation life cycle engineering renewable energy technologies reuse and recycling techniques smart design smart materials sustainable business models and sustainable construction green design materials and manufacturing processes is intended for engineers architects designers economists and manufacturers who are actively engaged in the advancement of science and technology regarding key sustainability issues leading to more suitable efficient and sustainable products materials and processes

research for research sake is no longer tenable or affordable to be valuable to society research must have impact this textbook takes the reader on a journey from how the uk research excellence framework assesses impact to real examples of outstanding research impact case studies along the way prof hugh mckenna describes and explains the case for research impact the challenges the link between research impact and evidence informed practice achieving impact through changing policy and engaging with the public how researchers can make their research findings more impactful and how research impact is assessment nationally and internationally it is written in an easily accessible and understandable style with reflective exercises amply distributed throughout its pages and helpful guides helping to engage readers and notably health professionals who are often turned off by the normal heavy research tomes this book makes the complex simple and the wearisome fascinating the short chapters are interesting and authoritative and can be read on a standalone basis allowing readers to dip in and out from his experience in various countries the author has a unique insight into what research impact is how it is assessed and how and where research findings can have the most benefit the stimulus for this book has been the excellent feedback that the author has received from health professionals students and fellow researchers there is always a risk that good knowledge and experience do not transfer well into a good textbook in research impact guidance on advancement achievement and assessment nothing has been lost in the transition the book will be of great interest to many health researchers from nursing to midwifery pharmacy medicine or any allied health professional but also to any research manager in all professions who want their research to bring positive change to society culture the economy health and quality of life it will be of particular interest to those who want to understand the difference between research impacts that are weak and those that are outstanding and how such assessments are made

this research study seeks to understand the nature of organisational change with respect to offshore outsourcing of information technology services in a multinational pharmaceutical company and to examine the effectiveness of approaches used to manage this change so that lessons may be drawn from these experiences despite the abundant literature on effective organisational change management the key factors that need to be managed properly at different stages of the offshore outsourcing process are not well understood the research adopts a processual view to paint a broad picture of the issues involved in these different stages a generic process model of change based on the review of the change literature was first developed to represent how change was intended to occur this model focuses on the following four stages in the change process context diagnosis and planning implementation and institutionalisation the research employs an interpretive case study approach and draws on fieldwork from three independent information systems departments cases of the company where offshore outsourcing programmes were implemented qualitative data from semi structured interviews direct observation and document analysis are analysed by applying the generic process model to produce a detailed account of the way in which change was managed in the case organisations the findings reveal that a

combination of contextual factors both external and internal to the company influenced the adoption and use of offshore outsourcing in the case organisations externally the economic forces were found to be the main catalyst for the change while internally the role of the executive leadership and the lack of internal resources further explain the motivations behind the adoption of offshore outsourcing the study illustrates that achieving successful outcomes from offshore outsourcing activities critically depends on the organisation adequately addressing a number of factors such as conveying a sense of urgency developing and communicating the vision identifying the benefits of change and how they will be delivered generating short term wins providing education and training developing a fit between the change and organisational culture etc throughout the change process the findings also highlight the effects of offshore outsourcing on the case organisations including change in job roles and responsibilities and organisational learning activities that enable corrective actions to improve change management efforts an important contribution of this research is the development of a model providing a more comprehensive understanding of the change process associated with the implementation of offshore it outsourcing recommendations for policy makers and change managers to improve change management practice based on the research findings as well as recommendations for further research form a significant part of the conclusions

lesson study the form of professional development long favoured by japanese teachers has recently been initiated by teachers at many sites across north america this handbook illuminates both the key ideas underlying lesson study and the practical support needed to make it succeed in any subject area nine chapters address topics including the basic steps of lesson study supports misconceptions system impact and how to pioneer lesson study in your setting the handbook provides practical resources including schedules data collection examples protocols for lesson discussion and observation and instructional plans for mathematics science and language arts

describes a systematic approach to reducing time to proficiency the book is divided into three sections 1 the learning path methodology which walks the reader through the major steps and strategies needed for building learning paths 2 doing the right training the reader is presented with a wide range of strategies methods and techniques that can be targeted to the training within a learning path and tied to an organization s particular business needs 3 do the training right in conclusion shows how to ensure the training within a learning path is delivered in the most cost effective manner and introduces methods for structuring training so that it transfers to the job easily and effectively
