iranian identity american experience philosophical reflections on race rights capabilities and oppression is a multidisciplinary study of oppression using the iranian american community as its case study in current studies of oppression there is little philosophical analysis or a theoretical framework to think about race from the perspective of an immigrant community in the united states that appears to be educated and affluent iranian identity american experience fills this gap alavi

discusses a theory of oppression that addresses not only the external oppression inflicted on people of color but also the everyday actions that leave them in oppressive situations the book ends with suggestions for addressing oppression both individually and as a collective and for fighting to minimize its harms

analyzing oppression presents a new integrated theory of social oppression which tackles the fundamental question that no theory of oppression has satisfactorily answered if there is no natural hierarchy among humans why are some cases of oppression so persistent cudd argues that the explanation lies in the coercive co opting of the oppressed to join in their own oppression this answer sets the stage for analysis throughout the book as it explores the questions of how and why the oppressed join in their oppression cudd argues that oppression is an institutionally structured harm perpetrated on social groups by other groups using direct and indirect material economic and psychological force among the most important and insidious of the indirect forces is an economic force that operates through oppressed persons own rational choices this force constitutes the central feature of analysis and the book argues that this force is especially insidious because it conceals the fact of oppression from the oppressed and from others who would be sympathetic to their plight the oppressed come to believe that they suffer personal failings and this belief appears to absolve society from responsibility while on cudd s view oppression is grounded in material exploitation and physical deprivation it cannot be long sustained without corresponding psychological forces cudd examines the direct and indirect psychological forces that generate and sustain oppression she discusses strategies that groups have used to resist oppression and argues that all persons have a moral responsibility to resist in some way in the concluding chapter cudd proposes a concept of freedom that would be possible for humans in a world that is actively opposing oppression arguing that freedom for each individual is only possible when we achieve freedom for all others

in matters such as affirmative action or home schooling rights of ethnic and other minority groups often come into conflict with those of society in a culturally diverse population such as ours but before considering the dilemmas posed by these issues we must first ask such basic but important questions as what group rights are and how they intersect with the principles of democracy this new collection brings together some of today's leading thinkers from the cutting edge of these debates taking in a broad range of issues confronting philosophers sociologists and political scientists contributors such as carl wellman carol gould and rex martin examine the nature of groups and the conflict between group rights and democracy and also consider case studies depicting current issues in cultural ethnic and religious rights the first section on the nature of groups examines some of the perplexing alternatives in the formulation of a theory of group rights these articles investigate the kinds of rights minorities might claim and ask when groups can be held responsible for the acts of some of their members the second section addresses the treatment of groups in a democracy and the precarious balance between indifference toward minorities and capitulation to their demands here the contributors examine five principles for the sensitive treatment of minority and disadvantaged groups in a democratic society a final section explores specific conflicts between subgroup and societal claims through case studies dealing with affirmative action religious practice and the education of children and the land rights of indigenous peoples by drawing on the legal and political dilemmas related to these cases the authors confront issues of core versus peripheral interests of individual member versus subgroup rights and of the possibilities for social openness raised in the preceding sections written from varied perspectives

groups and group rights offers stimulating reading for both students and professionals as it takes on some of the most pressing dilemmas confronting our society the essays collected in this volume are interdisciplinary in nature defying the traditional boundaries that compartmentalise and contain knowledge within particular camps heir to the 'undisciplining' legacy of cultural studies they attempt to transcend the restrictive frameworks of pre established discourse engaging in new and fruitful combinations of theories and methodologies the general aim of the book is to indicate new perspectives for the exercise of cultural criticism on the basis of the major issues that confront us today rather than articulate any canonical viewpoint on traditional cultural studies these essays thus share a common denominator in that they seek to explore the field of current 'experience' through the exercise of critique the recontextualisation of cultural studies that this book attempts occurs along the vectors of identity politics visual culture and technology the collection draws attention to the fact that these vectors do not consist in delimited 'camps' but rather in axes that intersect with each other at each instance

ideas linked to rational choice theory started to appear frequently in the economics literature in the 1960s and 1970s but the attention given to rationality widened to include commentators presenting far reaching appraisals and critiques the literature grew to a steady flow and spanned diverse areas of thought including socialist and rational choice marxist assessments and other approaches including institutional sociological psychological ethical choice theoretical strategic and game theoretical treatments of rationality this diversity of literature led to the creation of this volume the essays in this volume illustrate diversity and despite the variety of approaches there remains a common core of meaning that accommodates not so much a radically different set of concepts of rationality as a highly variegated array of methods and approaches to this subject contributors address topics of their choice on the concept of rationality in economics and the selection of these contributors is meant to represent a variety of backgrounds and approaches
