originally published in 1910 the will to power is the much respected work of friedrich nietzsche and is highly recommended for inclusion on the bookshelf of anyone with an interest in philosophy many of these earliest books particularly those dating back to the 1900s and before are now extremely scarce and increasingly expensive obscure press are republishing these classic works in affordable high quality modern editions using the original text and artwork

this book argues that the received view of the distinction between freedom and power must be rejected because it rests on an untenable account of the discursive cognition that endows individuals with the capacity for autonomy and self governed rationality in liberal and kantian approaches alike the autonomous subject is a self standing starting point whose freedom is constrained by relations of power only contingently because they are external to the subject s constitution thus the received view defines the distinction between freedom and power as a dichotomy michel foucault is arguably the most important critic of that dichotomy however it is widely agreed that foucault falls short of

justifying the alternative view he develops where power and freedom are essentially entangled instead the book fills out the gap by investigating the social preconditions of discursive cognition drawing on pragmatist inferentialist resources from the philosophy of language wittgenstein sellars and brandon it presents a new interpretation of foucault's philosophy that is unified by his overlooked idea of the archaeology of knowledge as a result the book not only explains why and how power and freedom must be entangled but also what it means ethically to pursue and gain autonomy with respect to one's own understanding power and freedom in the space of reasons will appeal to scholars and advanced students working in social and political philosophy critical theory ethics philosophy of language and the history of 20th century philosophy the open access version of this book available at taylorfrancis.com has been made available under a creative commons attribution non commercial cc by nc 4.0 license any third party material in this book is not included in the oa creative commons license unless indicated otherwise in a credit line to the material please direct any permissions enquiries to the original rightsholder this research was funded in whole or in part by the austrian science fund fwf 10 55776 coe3 for open access purposes the author has applied a cc by nc public copyright license to any author accepted manuscript version arising from this submission published with the support of the austrian science fund fwf 10 55776 pub1157
