this is the first comprehensive history of conscription and the military in Italy from the restoration to the eve of
 WWI the comparative and transnational approach enables this work to compare and contrast the Italian experience
 with that of many other countries in the world as well as understand transfers and the adaptive and imitative
 processes that emerge when conscription and the military are viewed from an Italian perspective peacetime and
 wartime recruitment military life culture justice and civil military relationships are analysed using a wide range of
 sources and an interdisciplinary approach that combines top down and bottom up perspectives this enables the
 book not only to assess the contribution the military has made to the country in terms of state building nation
 building modernization pedagogical and disciplinary models gender identity and roles but also to reconsider the
 standard taxonomies as well as some established evolutionary models of the armies moreover the Italian military is
 seen as an internally complex world that is incapable of defining its own one dimensional identity or of imposing
 any such identity on its members consequently it is an element in the history of a country that is substantially the

same as any other such element and thus important in people's collective and individual lives whether or not they are in uniform rather than being an object of study in and of itself the military becomes a vantage point from which to observe the Italian history in the long 19th century therefore this book can be profitably read by professional military historians and non specialist readers interested in the military as well as by all scholars working on Italian pre and post unification political institutional socio economic cultural and gender history

new diplomatic history has turned into one of the most dynamic and innovative areas of research especially with regard to early modern history it has shown that diplomacy was not as homogenous as previously thought on the contrary it was shaped by a multitude of actors practices and places the handbook aims to characterise these different manifestations of diplomacy and to contextualise them within ongoing scientific debates it brings together

scholars from different disciplines and historiographical traditions the handbook deliberately focuses on european diplomacy although non european areas are taken into account for future research in order to limit the framework and ensure precise definitions of diplomacy and its manifestations this must be the prerequisite for potential future global historical perspectives including both the non european and the european world
