understanding reading abilities and their development is fundamental for language comprehension and human
 cognition now in its second edition this book draws on research from multiple disciplines to explain reading
 abilities in both L1 and L2 and shows how this research can be applied in practice in order to support reading
 development research into reading has progressed a great deal since the first edition was published so this
 edition has been completely updated and revised in order to reflect these advances all chapters present
 updated research studies and completely new chapters are included on the neurocognition of reading reading
 writing relationships and digital reading if you want to know how reading works no matter the language s
 involved as well as how it can be taught effectively this book provides a persuasive research foundation and
 many practical insights it is essential reading for academic researchers and students in applied linguistics and
 TESOL

this book describes the data team procedure a method for data based decision making that can help schools to
 improve their quality it involves the use of teams consisting of 4-6 teachers 1-2 school leaders and a data expert

the members of the team collaboratively learn how to use data to solve an educational problem within the school adopting a systematic approach the data team procedure is an iterative and cyclic procedure consisting of eight steps the data team members are trained in the data team procedure by a coach the coach visits the data team s school regularly for a meeting and facilitates working according to the systematic procedure teams participate in data analysis workshops for more specific support divided into three parts the book first describes the importance of data use and the data team procedure next it describes two cases the first case concerns a data team working on a school level problem reducing grade repetition the second case concerns a data team working on a classroom level problem low student achievement in english language the last part of the book explains what it means to implement the data team procedure in the school the conditions needed for implementing the data team procedure and the factors that may hinder or support the use of data in data teams

now in its third edition teaching and researching reading charts the field of reading first and second language systematically and coherently for the benefit of language teaching practitioners students and researchers this volume provides background on how reading works and how reading differs for second language learners the volume includes reading curriculum principles evidence based teaching ideas and a multi step iterative process for conducting meaningful action research on reading related topics the volume outlines 14 projects for teacher adaptation and use as well as numerous new and substantially expanded resource materials that can be used for both action research and classroom instruction

if a student researcher had only one handbook on their bookshelf miller and salkind s handbook would certainly have to be it with the updated material the addition of the section on ethical issues which is so well done that i m recommending it to the departmental representative to the university irb and a new part 4 on qualitative methods the new handbook is an indispensable resource for researchers dan cover department of sociology furman university i have observed that most instructors want to teach methodology their way to imbue the course with their own approach miller salkind allows one to do this easily the book is both conceptually strong e g very good coverage of epistemology research design and statistics and at the same time provides a wealth of practical knowledge scales indices professional organizations computer applications etc in addition it covers the waterfront of methodology michael l vasu director of information technology north carolina state university a

unique and excellent reference tool for all social science researchers and a good textbook for graduate students and senior year undergraduate classes these students are about to enter the real life of research and need a handy and comprehensive tool as a starting point that offers shortcuts for getting into real research projects for a small project the book offers enough information to get the project started for big projects the book is ideal for information on where to look for things and examples jianhong liu department of sociology rhode island college the book considered a necessity by many social science researchers and their students has been revised and updated while retaining the features that made it so useful the emphasis in this new edition is on the tools graduate students and more advanced researchers need to conduct high quality research features benefits provides step by step instruction for students research training by beginning with how to find a creative idea a middle range theory and initial hypothesis and proceeds through design proposal collection and analysis of data followed by writing reporting and publication section on scales and indices are organized so that readers can quickly locate and find the type of scale or index in which they may be interested all sections are now followed by useful and well considered reference sections so that readers can read more about each topic includes updated coverage on new scales internal and external validity and new analytic techniques with extensive references on each presents extensive coverage of how to prepare manuscripts for publication including a list of all journals covered by sociological abstracts along with the editorial office address and url for each entry discusses the importance of policy research with presentation and discussion of specific models as an adjunct to both applied and basic research techniques provides extensive coverage of funding opportunities including those offered by the national institutes of health the national science foundation and a directory of private funding sources including relevant contact information new to this edition new part 4 by john creswell and ray maietta provides a comprehensive introduction to qualitative methods including a review of existing computer applications for collecting and analyzing data new and more current reviews and commentaries have replaced dated or no longer relevant excerpts thousands of new references on the assessment of important sociological variables as well as references to such topics as statistical analysis computer applications and specific topics thoroughly updated information on the use of computers and online research techniques including beginning and intermediate material about the internet and its use by the modern research scientist coherent and thoughtful review of the most popular statistical analysis software packages new guidelines and discussion of ethical practices in social and behavioral science research including extensive coverage of
