stands up to reader critique the fourth edition has been thoroughly but respectfully revised by Joseph Bizup and William T. Fitzgerald. It retains the original five-part structure as well as the sound advice of earlier editions but reflects the way research and writing are taught and practiced today. Its chapters on finding and engaging sources now incorporate recent developments in library and internet research, emphasizing new techniques made possible by online databases and search engines. Bizup and Fitzgerald provide fresh examples and standardized terminology to clarify concepts like argument warrant and problem following the same guiding principle as earlier editions: that the skills of doing and reporting research are not just for elite students but for everyone. This new edition retains the accessible voice and direct approach that have made *The Craft of Research* a leader in the field of research reference, with updated examples and information on evaluation and using contemporary sources. This beloved classic is ready for the next generation of researchers. Over 700,000 copies sold every step of the academic research process from the why of research through forming the research question, formulating an argument, and revision. Helpful chapters on research ethics, formulation of writing assignments for teachers, and an appendix of research tools for both off and online. Clear advice on building a strong argument in an age of false claims. Careful attention to both the how and why of objective research-based writing.
