strategic corporate social responsibility sustainable value creation redefines corporate social responsibility csr as being central to the value creating purpose of the firm based on a theory of empowered stakeholders this bestselling text argues that the responsibility of a corporation is to create value broadly defined in this new fourth edition author david chandler explores why some firms are better at csr and how other firms can improve their csr efforts keep your course content up to date subscribe to david chandler s csr newsletters by e mailing him at david chandler ucdenver edu the newsletters are designed to be a dynamic complement to the text that can be used for in class discussion and debate past newsletters are archived as a freely available resource for instructors and students at strategiccsr sage blogspot com

this work deals with hybrid value creation i e the process of generating additional value by innovatively combining products tangible component and services intangible component vivek k

velamuri provides a systematic assessment of the state of the art of the field and identifies empirically derived strategies for hybrid value creation in addition it helps practitioners to come to grips with understanding the dynamics of hybrid value creation irrespective of the industry they are in at the same time directions for future research are identified and provided

value creation and its effects on transfer pricing and tax law emerging from the oecd g20 beps project a new somewhat fuzzy notion of value creation came to permeate not only transfer pricing language but also wider allocation rules and anti abuse provisions in international tax law the notion of value creation reframes the interpretation and application of the arm's length principle that is embedded in articles 7 and 9 of the oecd model convention this new value creation notion and approach assist in understanding key enterprise functions while different industry sectors manifest these concepts in various ways situating such notions and this approach within the law of tax treaties and analyzing terms of the oecd transfer pricing guidelines alongside their factual context is the aim of this book here law students address transfer pricing and value creation in sectors as varied as commodities trade automotive consumer products food and beverages pharmaceutical and life sciences telecommunications and the key topic of value creation in a digitalized economy our llm students were required to address issues not explored in legal research and to discuss factual topics relevant for transfer pricing all students focused on topics that are new to the international tax debate that keep evolving and on factual matters that often escape legal research

this book offers new insights into value co creation in the context of sport management based on recent developments in academia e.g. service dominant logic and empirical evidence it highlights the significance of customers and other firms and organisations service networks for the creation of high quality products and services five articles shed more light on various aspects of value co creation including a sport value framework customer to customer value co creation platforms fan consumption communities value co destruction and coopetition strategies they also broaden our understanding of the processes that lead to joint value creation by different parties in addition the authors present insights that can be helpful in practice and describe guidelines and strategies

that are in line with the concept of value co creation in so doing this book helps to develop better theories and to provide guidance for sport managers for the design of value creation as a collaborative relational and dynamic process between multiple actors this book was published as a special issue of european sport management quarterly

times of crisis are unexpected and they bring diverse challenges and opportunities for companies financial markets and the economy on one hand more risk and uncertainties appear yet on the other hand it is an opportunity to reorganize and reinvent the company it is important for businesses to understand ways to deal with uncertainty and risk in times of economic downturn and what financial strategies and tools can be used to eliminate or reduce the potential negative effects these effects can reach the company s financial performance capital structure as well as cause financial debt and the availability of cash flow to companies however different financial instruments can sustain the business and deal with the difficulties of payment when sales reduce and uncertainty increases thus research is essential in this critical area when economic downturn affects the financial markets the role of banks country dynamics the economy and many other facets of the business world financial management becomes the key for business recovery the handbook of research on financial management during economic downturn and recovery shares relevant knowledge on challenges and opportunities caused by crises such as the pandemic and the effects on economic and financial arenas the chapters cover topics such as business models to understand how companies react to pandemic and crises situations as well as how they change their management and way of conducting business other important topics include sustainable development international financial markets capital structure changes uncertainty and risk and governance and leadership this book is ideal for shareholders directors and managers economists researchers academics practitioners stakeholders researchers academicians and students interested in knowledge on topics about challenges in the way that companies financial markets financial institutions and governments respond to risk and uncertainty

this book focuses on novel design and systems engineering approaches including theories and best practices for promoting a better integration of people and engineering systems it covers a range of hot topics related to development of activity centered and user centered systems interface design

and human computer interaction usability and user experience cooperative participatory and contextual models emergent properties of human behavior innovative materials in manufacturing and many more particular emphasis is placed on applications in sports healthcare and medicine the book which gathers selected papers presented at the 1st international conference on human systems engineering and design future trends and applications ihed 2018 held on october 25 27 2018 at chu université de reims champagne ardenne france provides researchers practitioners and program managers with a snapshot of the state of the art and current challenges in the field of human systems engineering and design

the book develops manufacturing concepts and applications beyond physical production and towards a wider manufacturing value chain incorporating external stakeholders that include suppliers of raw materials and parts customers collaborating manufacturing companies manufacturing service providers and environmental organisations the focal point of the value chain remains as a manufacturing system and its operations while flows of parts materials and information and services across the supply value chain tiers are taken into account the book emphasises on the two innovative paradigms of reconfigurable manufacturing systems rms and the 4th industrial revolution industry 4.0 along with their incorporated development rms as a relatively new paradigm has been introduced to meet the requirements of the factories of the future which is aimed by industry 4.0 though introducing greater responsiveness and customised flexibility into production systems in which changes in product volumes and types occur regularly manufacturing responsiveness can be achieved by rms through reconfiguring the production facilities according to changing demands of products and new market conditions the book addresses challenges of mass customisation and dynamic changes in the supply chain environment by focusing on developing new techniques related to integrability scalability and reconfigurability at a system level and manufacturing readiness in terms of financial and technical feasibility of rms it demonstrates the expected impacts of an rms design on operational performance and its supply value chain in the current future manufacturing environment facing dynamic changes in the internal external circumstances in order to establish a circular economy through the rms value chain an integrated data based reconfiguration link is introduced to

incorporate information sharing amongst the value chain stakeholders and facilitate grouping products into families with allocation of the product families to the corresponding system configurations with optimal product process allocation decision support systems such as multi criteria decision making tools are developed and applied for the selection of product families and optimising product process configuration the proposed models are illustrated through real case studies in applicable manufacturing firms

doctoral thesis dissertation from the year 2014 in the subject business economics business management corporate governance grade a japan advanced institute of science and technology language english abstract customers are increasingly becoming active participants and co creators of value in the mobile internet era with this trend employees are encouraged to engage in active dialogue with customers effectively manage customer diversity and co create personalized experiences such changes challenge the leadership the relevant literature reveals that the significance to leadership of shared vision has attracted attention and become widely acceptable however there is a large gap in the literature regarding how to model the building of shared vision in service business our study represents a first attempt to shed light on how vision co creation between leaders and employees can affect the leadership in corporate transformation based on comparisons of the leadership literature regarding product oriented and service oriented companies we hypothesised about vision co creation with employees then we conducted an in depth case study in a leading software company in china and interviews in four multinational it companies in japan this study suggests that vision co creation with employees is imperative for leaders in today s service dominant business in the co creation process six relevant working states of employees are defined non engagement expectation satisfaction engagement loyalty and creativity as a firm creates a new vision or makes the existing corporate vision into a shared vision it goes through these phases we propose specific implications of the issues and focus on each phase to address the concerns this research makes a contribution by addressing concerns that many companies are over managed and under led traditional management systems such as management rules pdca performance appraisals and incentive systems are still indispensable but are not enough to lead employees to work in the high tier state the co creation

process makes the new vision come alive so that it can be imagined experienced pursued and worked hard for in the final chapter we provide suggestions for future research the position centred one person leadership described in the previous literature leaves the substantial talents of employees largely untapped

this volume contains five sections section one provides a brief historical discussion of the oil industry and the forces which constantly drive the need for change section two and three detail business strategies and tips for building and maintaining high performance operations section four examines the special case of national oil companies and section five discusses integration looking at issues relevant to the 21st century
