throughout his tenure as the first black springbok coach peter de villiers was in the news and not always for the right reasons his battle to be accepted and respected by the rugby fraternity started from the moment his appointment was announced when his new boss admitted that de villiers had got the job for reasons other than only rugby in his four years as bok coach de villiers experienced huge successes a series win over the british irish lions and a tri nations trophy but he also suffered the ignominy of coming last in the tri nations and seeing his world cup dream shattered

by the controversial officiating of referee bryce lawrence in addition his outspoken nature and colourful application of the metaphor alternately amused and horrified south african rugby fans and his close relationship with his senior players begged the question who was coaching whom now in his autobiography de villiers answers this question and addresses many more how he managed to progress from the dusty streets of paarl as a rugby mad youngster to the highest job in south african rugby why his employers tried to manipulate him but failed why he stuck with john smit as captain in the 2011 rugby world cup and where his passion for rugby will lead him next if rugby fans thought they knew peter de villiers before reading this book they will think differently afterwards

2022 winner of the oiv award in the oenology category an essential guide to the faults and flaws that can affect wine written by the award winning wine expert keith grainger this book provides a detailed examination and explanation of the causes and impact of the faults flaws and taints that may affect wine each fault is discussed using the following criteria what it is how it can be detected by sensory or laboratory analysis what the cause is how it might be prevented whether an affected wine is treatable and if so how and the science applicable to the fault the incidences of faulty wines reaching the consumer are greater than would be regarded as acceptable in most other industries it is claimed that occurrences are less common today than in recent recorded history and it is true that the frequency of some faults and taints being encountered in bottle has declined in the last decade or two however incidences of certain faults and taints have increased and issues that were once unheard of now affect many wines offered for sale these include reduced aromas premature oxidation atypical ageing and very much on the rise smoke taint this book will prove invaluable to winemakers wine technologists and quality control professionals wine critics writers educators and sommeliers will also find the topics highly relevant the wine loving consumer including wine collectors will also find the book a great resource and the basis for discussion at tastings with like minded associates reviews i read this book avidly from cover to cover i ll dip into it for future reference as required which is how many will employ it meanwhile i learned a great deal and it now influences how i think about wine evaluation i commend this excellent new book to you consider it an investment paul howard wine alchemy

inhaltsangabe abstract the emergence of information and communication technologies ict has launched a global debate digital or technological revolution

about a paradigm shift from an industrialised towards an information society in the front of this debate lies the assertion that the application of ict is the impelling factor of transformation which will result in far reaching changes within all parts of the economy the society and the state the state plays therefore an important role for this transformation first the creation of a new economy which stands for a branch of industry that develops and produces hardware software and communication equipment and its penetration and application into the whole economy the emergence of e buzzwords such as e commerce or e business are related to the application of ict within the economy second after a laissez faire policy implementation through the state it has to care for social aspects such as to connect the society to the internet and create a digital literate society this second stage of the information society has its expression in the common used catchword digital divide finally the state itself comes under pressure to apply ict within government institutions expressed by the latest catchwords of e government and e governance their hype chiefly technologically determined can be equated with the emergence of the new economy within the global debate about the information society emerged from developed countries e government and e governance experience an increasing use in developing countries their advocates i e international development organisations stress the catchwords for the purpose of poverty alleviation improved living standards and economic growth in developed and particularly in developing countries furthermore both subjects of the thesis have started up a new tractive force within the debate of public administration reforms both can be summarised as ict led public administration reform they are deemed to be an impelling factor of organisational change and transformation of governmental institutions moreover the literature concerning both catchwords is full of positive expectations i e enhance participation accountability transparency and overall democracy and thus they are seen as a medium to implement and support their theoretical concepts new public management npm and good governance fairly few observations in developed countries

the world was quietly going about its normal business when late in 2019 the entire global world of 195 countries even china was turned completely on its head by a fake virus and a fake pandemic however the world was not to know at the time and for the most part still does not know until the publication of this book that the entire chapter and verse of the virus paradigm called sarscov2 and its ensuing ailment covid19 and its pandemic were all total lies and fake lies and fake propagated by

hidden persons and their nominated puppets in mostly unelected globalist organisations beyond the reach of sovereign states who wef un world bank etc who in reality control the world consequently in early 2020 and the following months through to 2021 there was a world wide nightmare that no one seemed to fully understand or indeed understand at all this nightmare was known variously as coronavirus sars cov2 and covid19 coronaviruses can cause mild disease similar to a common cold sars cov2 severe acute respiratory syndrome coronavirus 2 was claimed to be a novel new coronavirus and the illness covid19 was supposedly caused by sars cov2 mass induced dystopian nightmare the dystopian nightmare had only just begun and was to last almost two full years 2020 2022 horrible images appeared from china not the most democratic country in the world then from italy and other countries until world wide preposterous projections of not to happen global deaths based on very flawed computer models were bandied about to an unknowing mass of a very frightened and unfortunately deliberately ill informed global population global mass media fanned the flames morning day and night for many months on end inappropriate quarantine measures were globally in lockstep imposed that restricted human movement to an inhuman level that people were not permitted to see their loved ones when their loved ones were dying in hospitals and care homes the world was a surreal dystopian horror story police vans patrolling the street at night complete lockdown and no one allowed outside except for one hours walk per day no gatherings greater than six empty streets closed and boarded shops empty parks and empty beaches draconian civil rights restrictions were imposed the global economic and social life the world over were about to fall into total collapse on what data were these extreme measures taken was the world really under such a massive threat that we had to close down global capitalism for 2 years had the benefits of these very severe measures been adequately assessed against the damage that they would also no doubt cause to the global economy and to individual person s lives throughout the world no they had not they were simply imposed globally without recourse to any open debate or serious risk analysis medico totalitarianism strode the world like a great dictator with all debate and opposition silenced by the baying mob of puppet mainstream media until the publication of this book covid compensation shocking truth revealed by the finest independent scientific medical and legal minds in the world

a title in the emerging issues in analytical chemistry series designer drugs chemistry analysis regulation toxicology epidemiology legislation of new psychoactive

substances presents both an overview and a guide to techniques for designer drug analysis proliferation of the synthesis and use of designer drugs is a serious public health problem with social economic and legal implications whether abuse is studied at the population level or the individual level researchers need both background and highly detailed technical information on specific drugs and drug classes in order to combat the proliferation and highly damaging consequences of these substances author roy gerona provides a comprehensive discussion that emphasizes the potential threat to society presents the ongoing challenges confronting the various laboratory approaches to detection and identification of new chemical entities and informs the development of improved analytical solutions for use in legislation law enforcement and treatment designer drugs chemistry analysis regulation toxicology epidemiology legislation of new psychoactive substances offers an introduction to the field and a source of information on specific drugs drug effects and analytical tools to a wide audience for anyone studying or engaging in designer drug analysis analytical and medical chemists pharmacologist toxicologists and students researchers and policy makers in the fields of drug abuse medicine public health and forensics will greatly benefit from this essential text summarizes available literature and evaluates the strengths and weaknesses of analytical methods for detecting and identifying designer drugs directs the reader to sources of further reading at the conclusion of each chapter emphasizes the potential threat to society presents ongoing challenges confronting various laboratory approaches to detection and identification of new chemical entities
