this book provides a comprehensive exploration of how artificial intelligence ai is being applied in the fields of cyber security and digital forensics the book delves into the cutting edge techniques that are reshaping the way we protect and investigate digital information from identifying cyber threats in real time to uncovering hidden evidence in complex digital cases this book offers practical insights and real world examples whether you re a professional in the field or

simply interested in understanding how ai is revolutionizing digital security this book will guide you through the latest advancements and their implications for the future includes application of ai in solving real cyber security and digital forensics challenges offering tangible examples shows how ai methods from machine deep learning to nlp can be used for cyber defenses and in forensic investigations explores emerging trends and future possibilities helping readers stay ahead of the curve in a rapidly evolving field

alternative urban spaces across civic private and public spheres emerge in response to the great challenges that urban actors are currently confronted with labour markets are changing rapidly the availability of affordable housing is under intensifying pressure and public spaces have become battlegrounds of urban politics this edited collection brings together contributors in order to spark an international dialogue about the production of alternative urban spaces through a threefold exploration of alternative spaces of work dwelling and public life seeking out and examining existing alternative urban spaces the authors identify the elements that provide opportunities to create radically different futures for the world s urban spaces this volume is the culmination of an international search for alternative practices to dominant modes of capitalist urbanisation bringing together interdisciplinary empirically grounded chapters from hot spots in disparate cities around the world offering a multidisciplinary perspective the production of alternative urban spaces will be of great interest to academics working across the fields of urban sociology human geography anthropology political science and urban planning it will also be indispensable to any postgraduate students engaged in urban and regional studies
